## PRESENTATION

This annual comparative report brings criminal statistics recorded by the Colombian National Police (CNP), to provide a comprehensive account of the different achievements that have been reached in rural and urban scenarios, leading to the reduction of the main high impact crimes that affect the Colombian society.

Although the present report reflects the latest patterns and trends of crime during 2006 compared to 2005 figures, it is important to emphasize that the decrease in violence and delinquency indicators have been reached not just as a consequence of the current situation but due to the coherent and systematic work of the National Government, through the implementation of the Defense and Security Policy, oriented to recover the country's credibility and to generate a peaceful coexistence among citizens.

The first part of the study is related to offenses which affect the democratic security of the Nation and the colombian citizen's safety which includes the analysis of thirteen different types of offenses and their variables. The second part is focused in the operative achievements reached by CNP, including items such as arrests for all crimes, recovered and seized merchandise, drugs and cars, as well as information about expropriation, as a result of the government's struggle against illicit drugs.

This Crime Report is an important source of information for those interested in the dynamics of delinquency in Colombia, since it enables them to corroborate for example, the reductions recorded during 2006 compared with 2005 figures, in the total number of homicides, extortion and kidnapping, of 3%, 5% and 14%, respectively; offenses of high importance for the international community as they generate expectations of certainty for making better decisions.

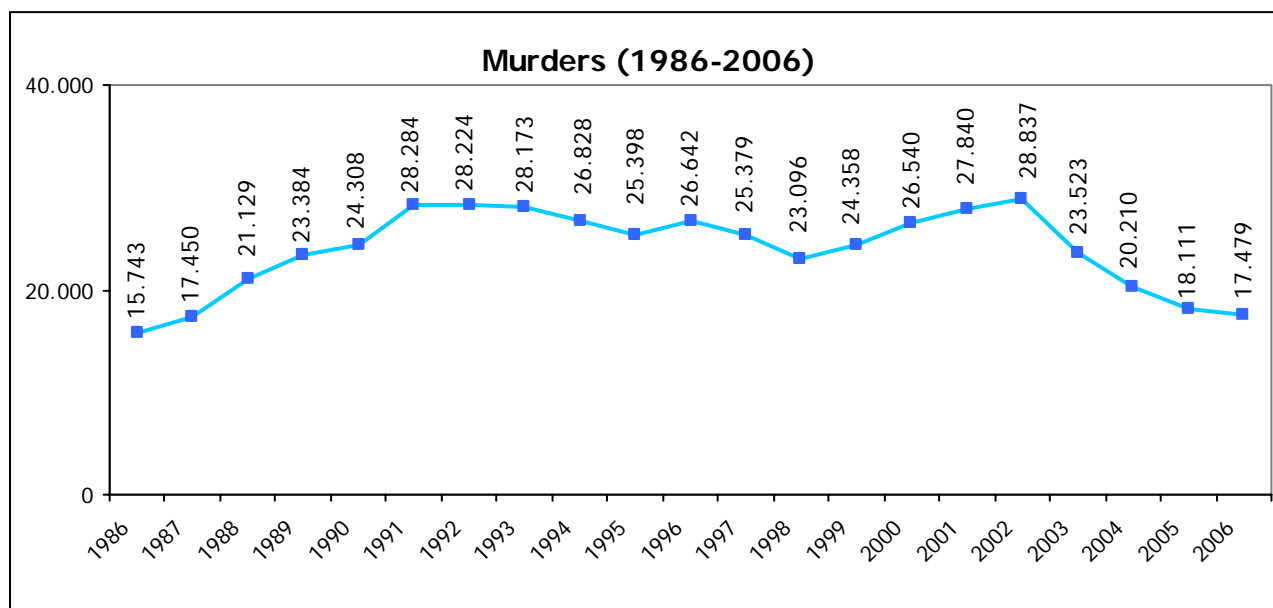

In a joint effort, the Colombian National Police and the Military Forces have fought against all modalities of crime, sending a message that it is possible to invest in this Nation and contribute to its sustainable development.

Brigadier General **OSCAR ADOLFO NARANJO TRUJILLO**  
Criminal Investigation Director CNP

## I. MURDER

### National volume, trends and rates.

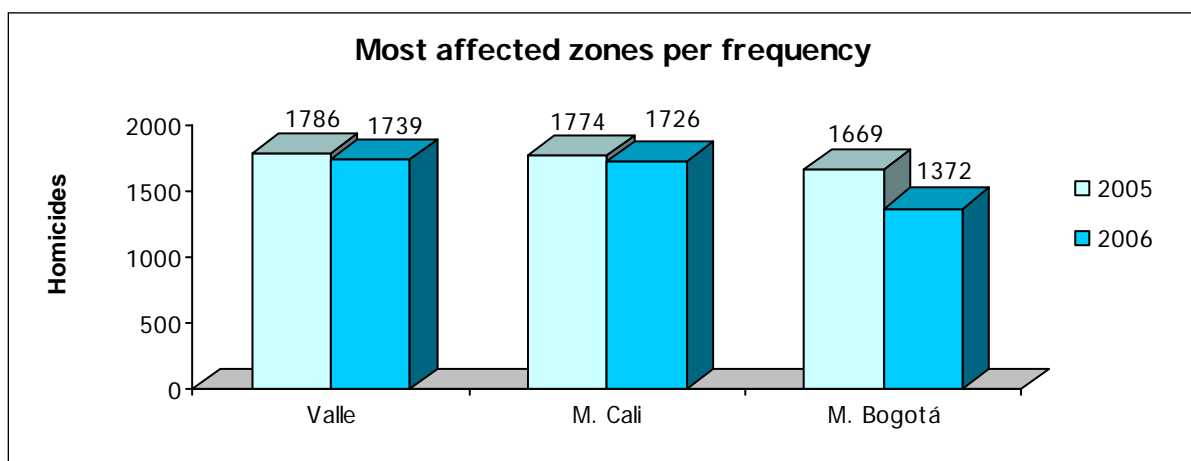

In 2006, occurrences of this offense decreased 3% compared with the 2005 number, down from 18,111 to 17,479 offenses, which means 632 fewer murders. The 2006 data also showed a decline in the rate per 100,000 inhabitants, falling from 39 in 2005 to 37 in 2006.

When looking at each month individually, July and December showed the highest peaks

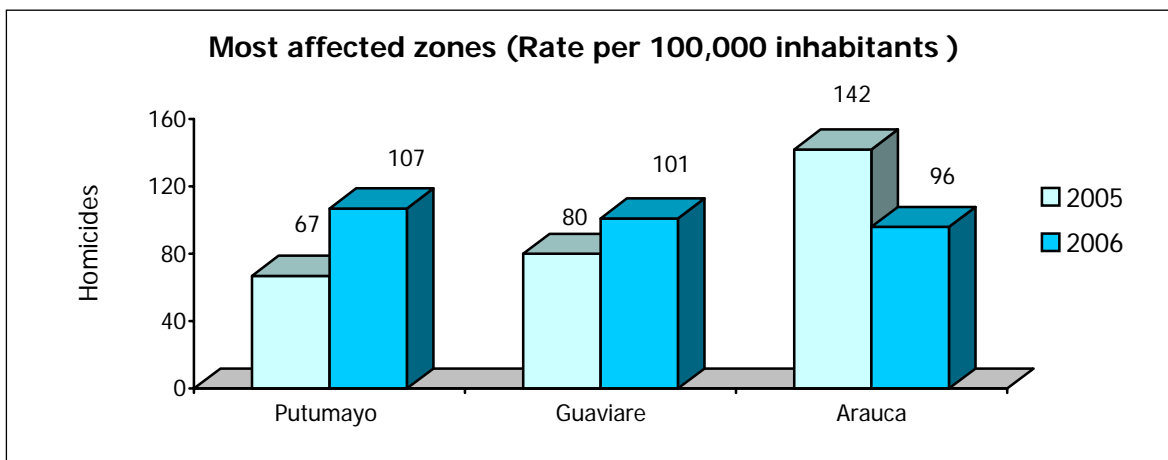

with 1.529 and 1.640 cases respectively; while February showed the lowest one. Besides, 149 police officers were killed while on duty during 2006, which means 40 fewer than in 2005.

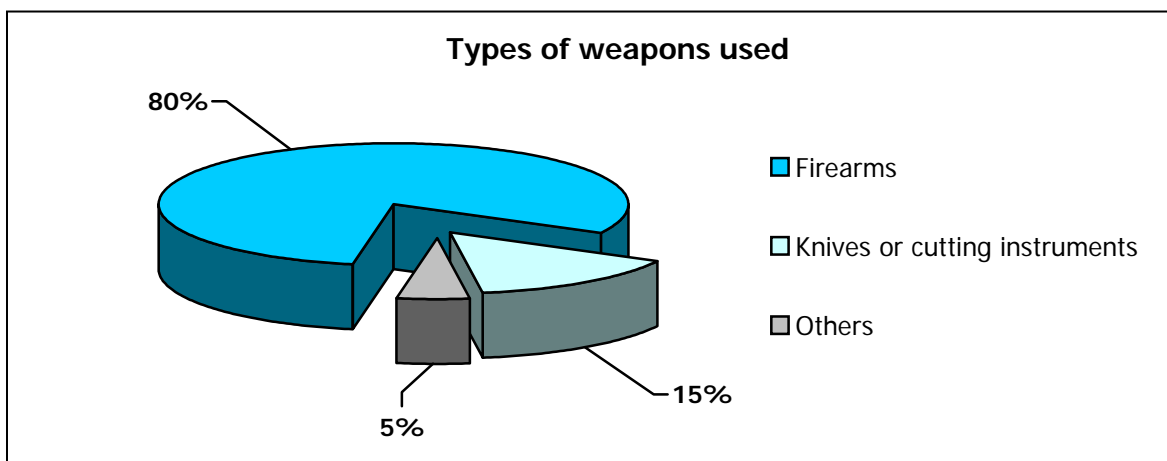

The 2006 data showed a significant 26% decrease while comparing to the 2003 data, falling from 23.523 murders in 2003, to 17.479 cases in 2006.

Although the Valle province and metropolitan areas of Cali and Bogotá were the most affected zones during 2006, with 1.739, 1.726 and 1.372 murders respectively, the 2006 data showed a reduction in the total number of murders over those areas, when comparing them with 2005. The most significant drop was reported in the Metropolitan area of Bogotá (18%), falling from 1.669 cases to 1.372, which means 297 fewer murders.

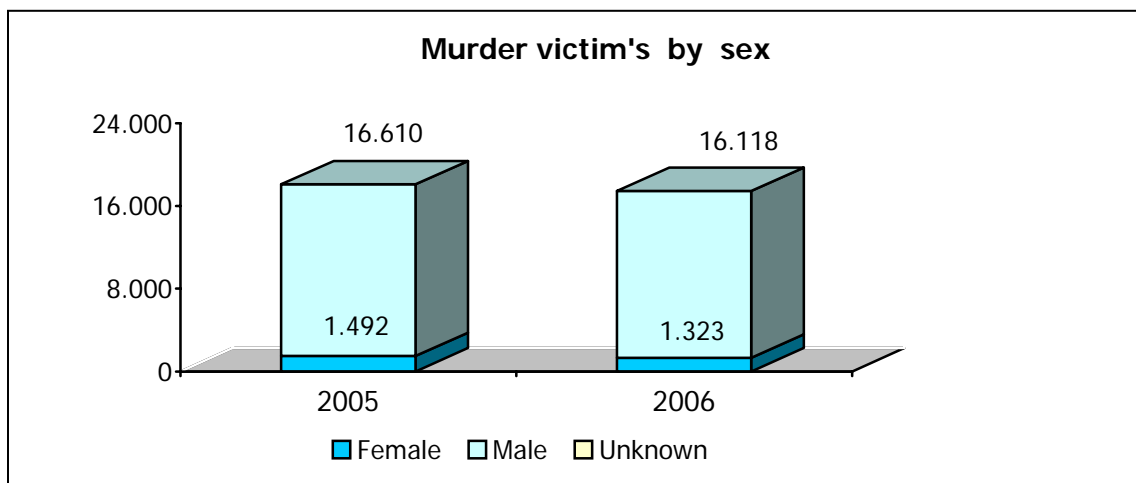

During 2006 Putumayo province was the most affected zone according to the rate per 100.000 inhabitants with 107 victims, 40 more than those in the previous year, followed by Guaviare province with 101 victims and Arauca province which showed a decrease of 32% while comparing with the 2005 figures, falling from 142 to 96 cases.

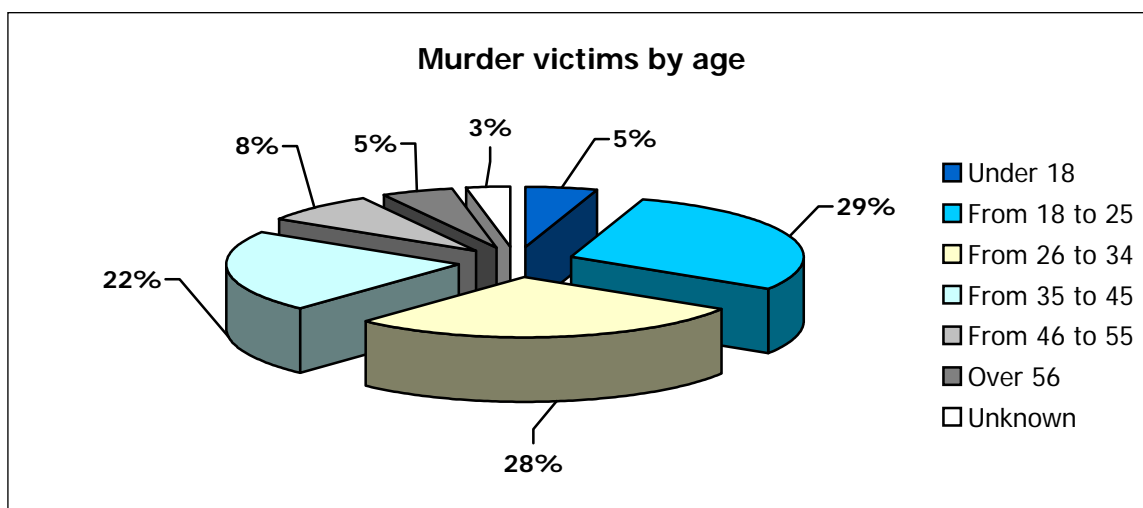

During the year 2006, 80% of the murders were committed with firearms and 15% with knives or cutting instruments; the remaining 5% of the offenses were committed with other weapons such as clubs and blunt objects, among others.

A breakdown of the data by gender showed that 92% of the total homicide victims were male, and 8% were female during 2006, the same proportion that was reported during 2005. In absolute terms, this equals to 1.323 female victims and 16.118 male victims in 2006.

While comparing 2006 data to 2005, there was a reduction of 492 male victims and there were 169 fewer female victims during the 2006 year.

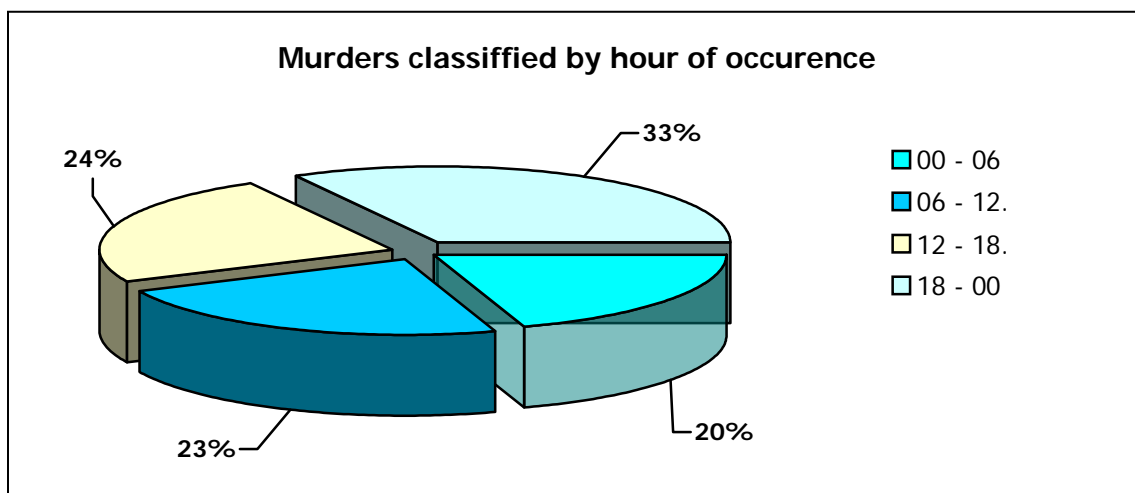

Classifying by age, the largest amount of murders during 2006 corresponded to people whose age was rated from 18 to 25, which equals to 29% or 5.096 offenses. The second place was found on people whose age was rated from 26 to 34, which equals to 28%. The fewest number of murders was reported on population under 18 and over 56 years old, which corresponded to 5% both of them or 921 and 808 cases respectively.

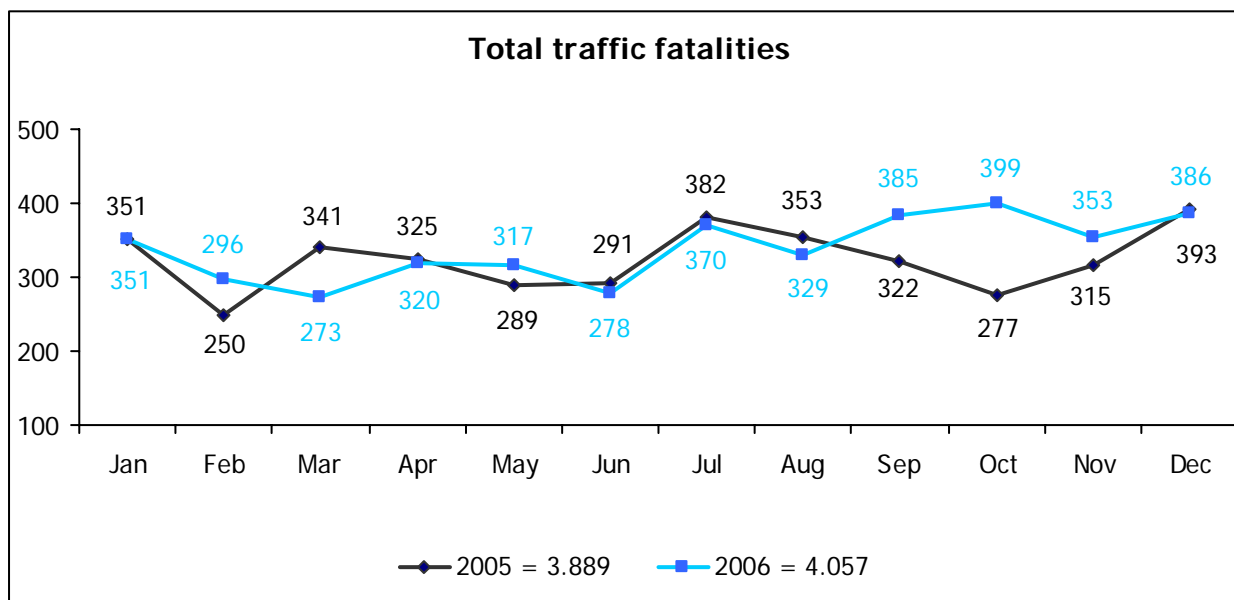

The figures reported on the chart next page, show that in 2006, 33% of the offenses occurred from 6:00 p.m. until midnight, with a total of 5.750 cases, repeating the same pattern that occurred in the previous year. The least amount of murders took place from midnight until 6:00 a.m. with 20% or 3.465 cases in 2006 which equals to 41 fewer cases than those occurred in 2005.

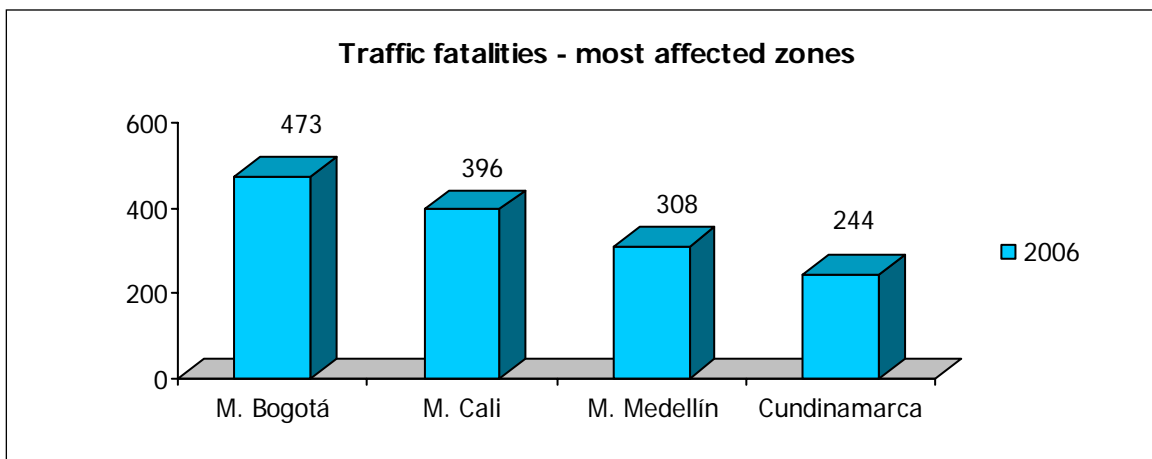

## II. TRAFFIC FATALITIES

### National volume, trends and rates

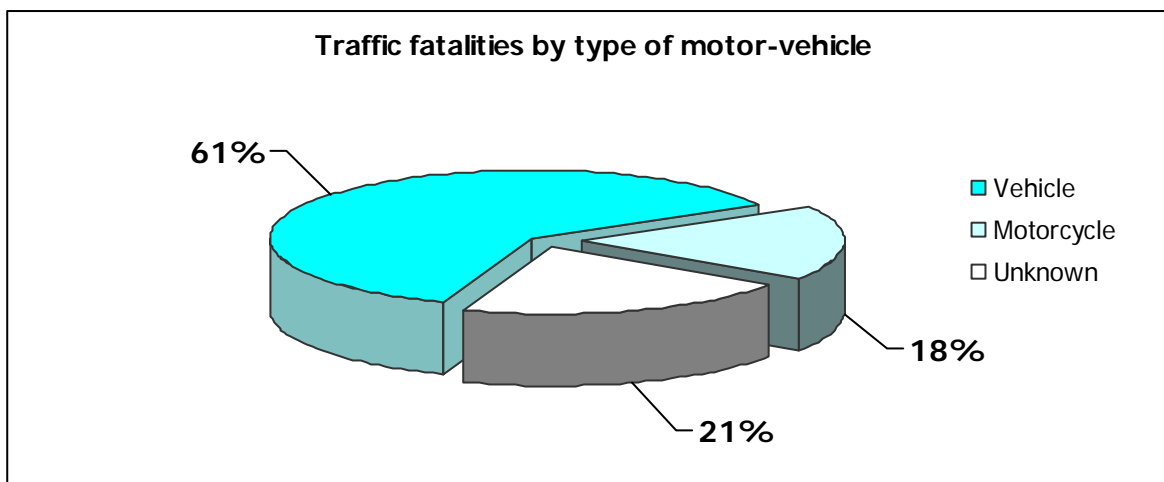

According to reports, this crime recorded an increase of 4% rising from 3.889 cases during 2005 to 4.057 cases during the same period in 2006. That is to say, the daily national average of occurrences amounts to 11 cases during 2006, the same amount registered in 2005.

March recorded the lowest figures of this crime with 273 cases, while October was the most affected month during 2006, with 399 cases.

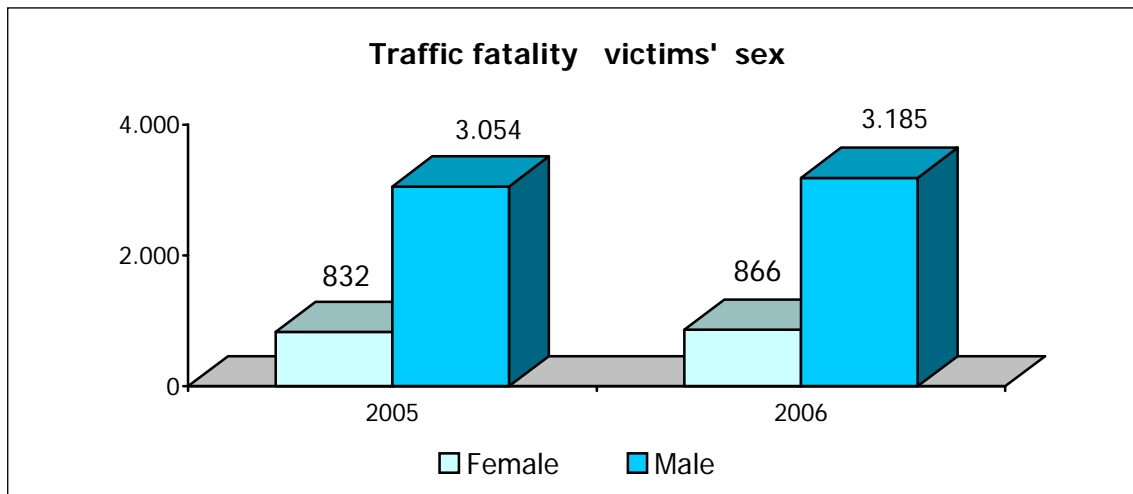

During 2006, the metropolitan area of Bogotá reported the largest amount of fatalities as a consequence of traffic accidents, with 473 cases, followed by the metropolitan areas of Cali and Medellín and the Cundinamarca province with 396, 308 and 244 deaths, respectively.

Though, Bogotá reported the largest amount of traffic fatalities in 2006, while comparing this number with the occurrences of this offense in 2005, there was a favorable decrease of 4%, which equals to 20 fewer cases.

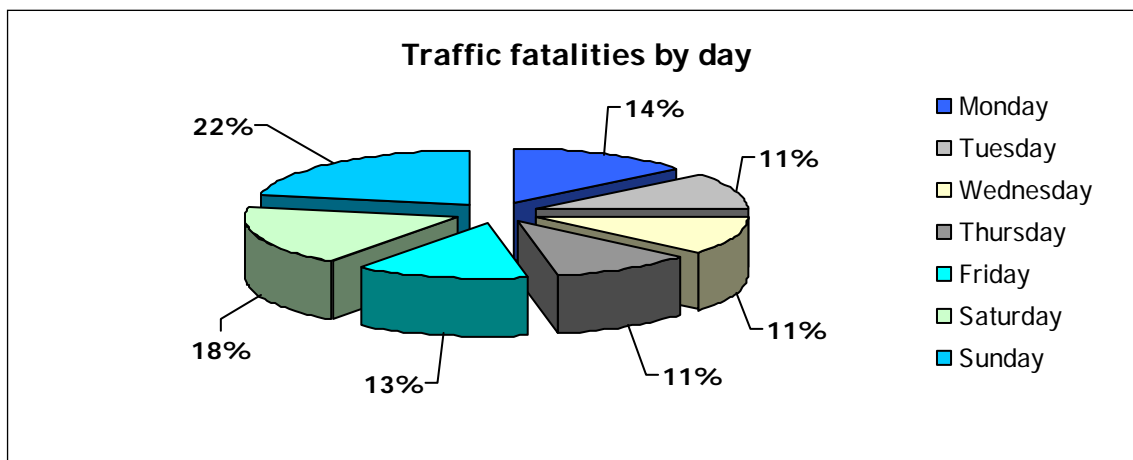

According to reports, 61% of the Traffic Fatalities were caused by vehicles, which equals to 2.459 cases, while 18% corresponded to accidents involving motorcycles. 21% of the cases did not specify the type of accident that caused the death.

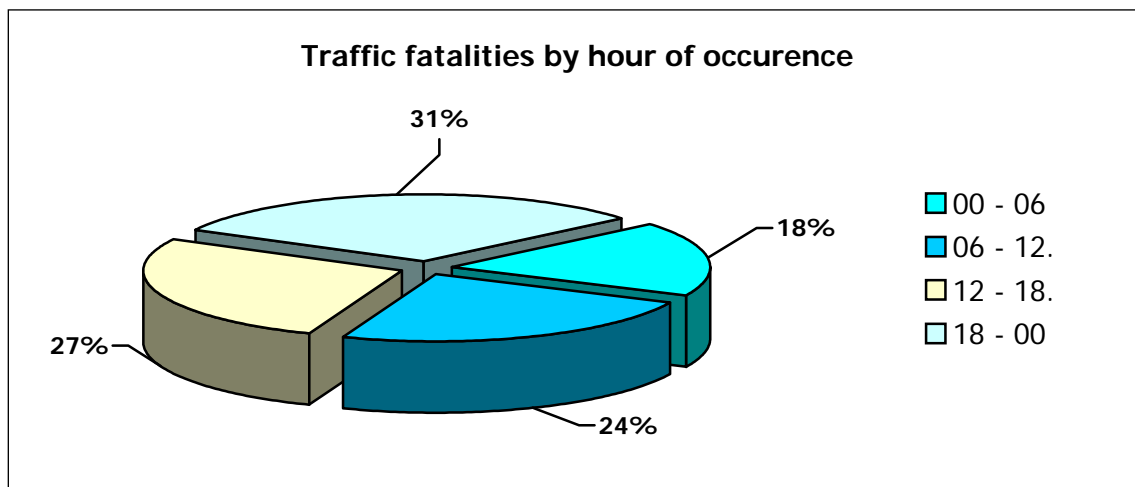

Analyzing the 2006 information by gender, the statistics reported that 79% of these deaths corresponded to male victims, which equals to 3.185 cases and 21% (866) corresponded to female victims.

Comparing 2006 with 2005, there was an increase of 4% in the number of male victims which equals to 131 more victims and a 4% increase in the number of female victims which equals to 34 more cases.

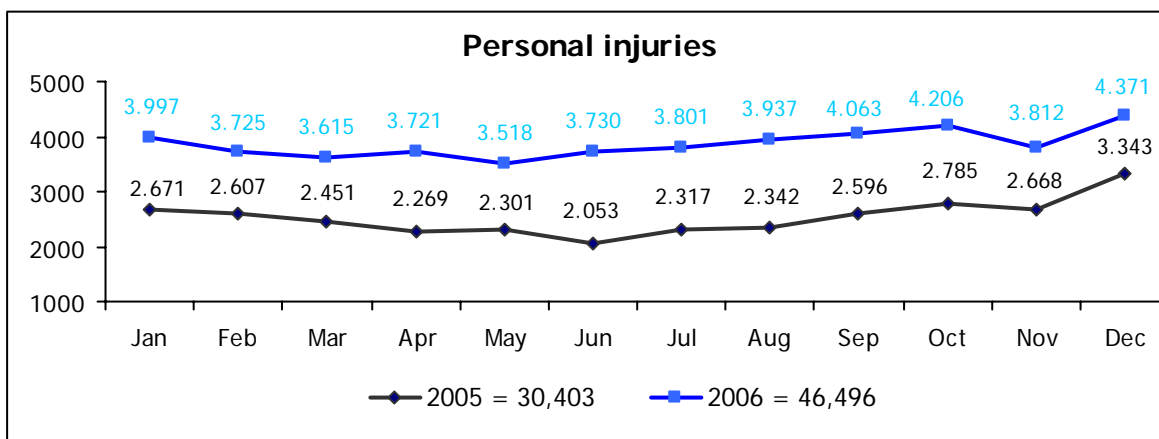

During 2006, Saturday and Sunday recorded the highest percentage of occurrence, with a participation of 17% and 22%, which equals to 673 and 904 deaths, respectively.

A breakdown of the data by hour of occurrence showed that most of the traffic fatalities took place from 6:00 pm to midnight (31%) in 2006 while in 2005 most of the traffic fatalities were reported from midday to 6:00 pm. On the other hand, the fewest number of deaths occurred from midnight to 6:00 am, since there is not so much traffic during that time.

### III. PERSONAL INJURIES

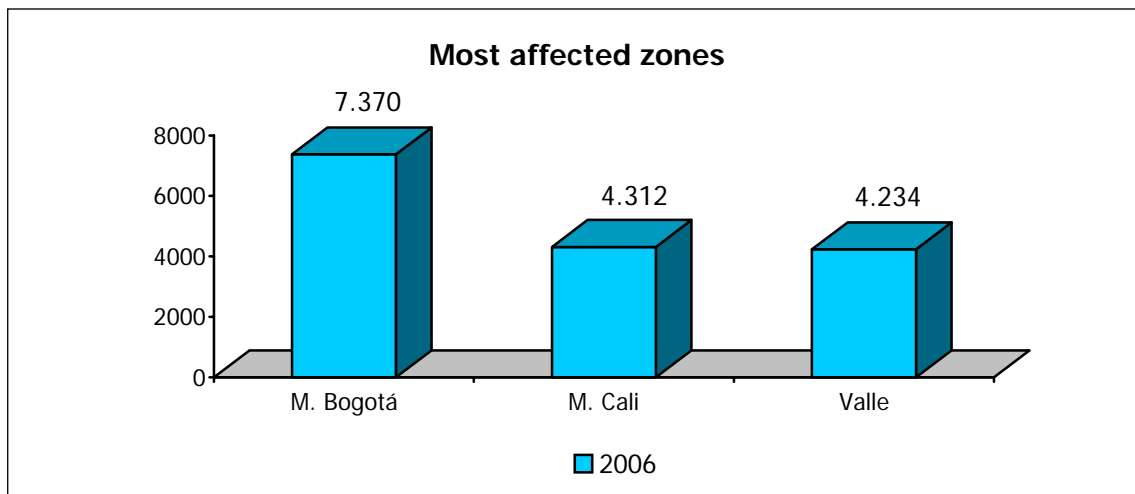

#### National volume, trends and rates

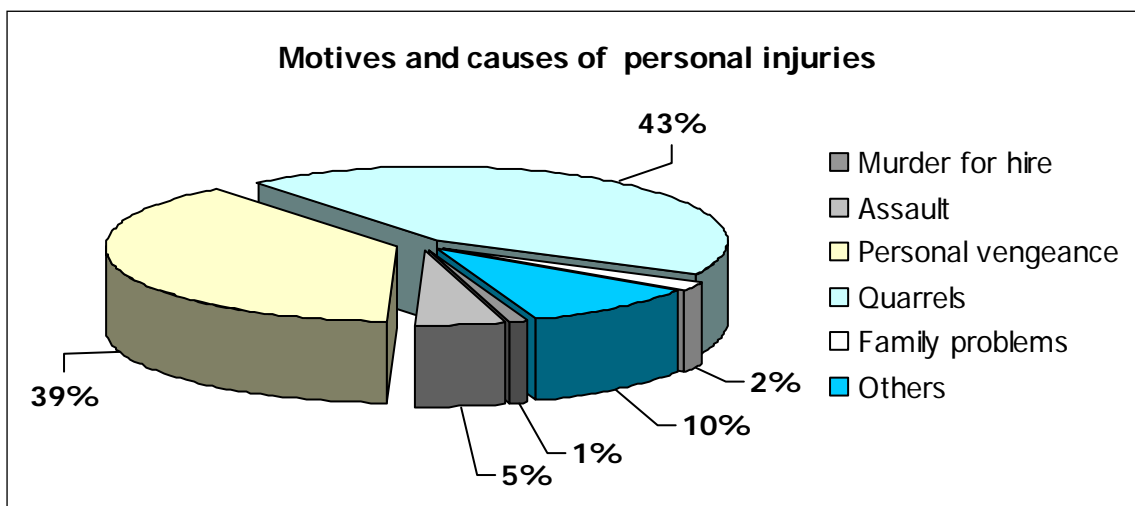

Personal Injuries showed an increasing trend when comparing 2005 with 2006. This increase was of 16.093 more cases corresponding to 53%, going up from 30.403 cases in 2005 to 46.496 cases in 2006.

When looking at each month individually in 2006, October and December reported the highest peaks, with 4.206 and 4.371 cases respectively.

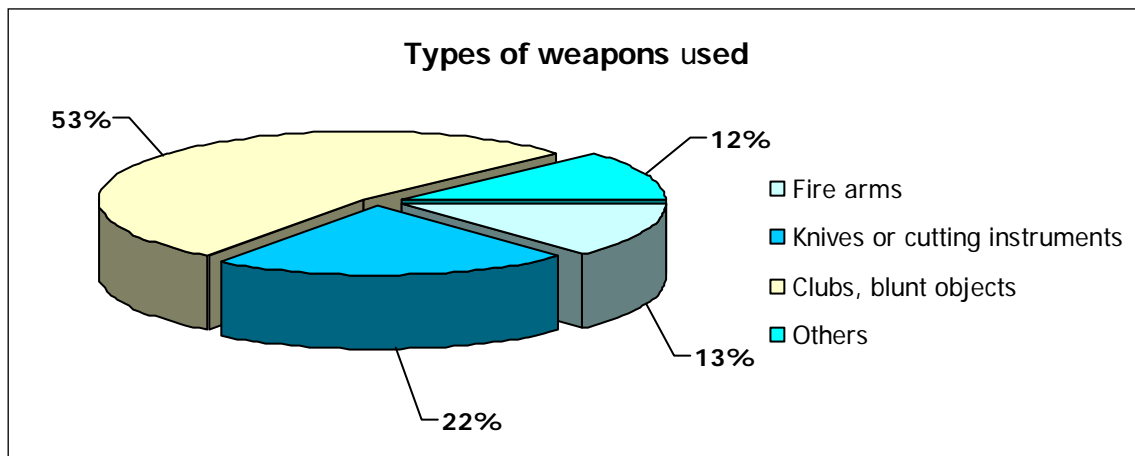

The daily average on 2006 was 127 which equal to 45 more wounds than the previous year, and 99 cases per 100.000 inhabitants.

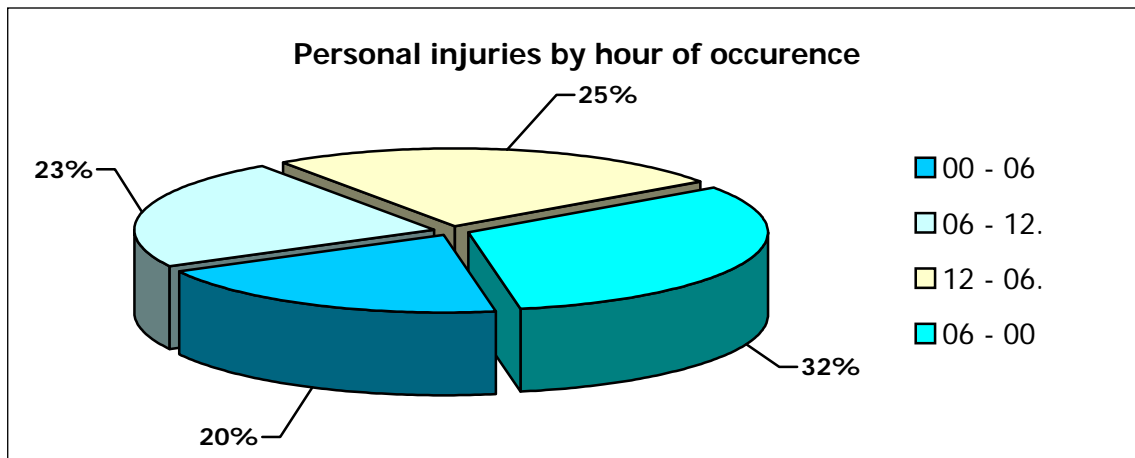

The most affected zones by this offense during 2006 were the metropolitan areas of Bogotá and Cali with 7.370 cases that represent 16% of participation, and 4.312 cases that represent 9% of participation respectively. In third place Valle province was rated with 4.234 cases and 9% of participation, which represents an increase of 2.885 cases compared with the previous year.

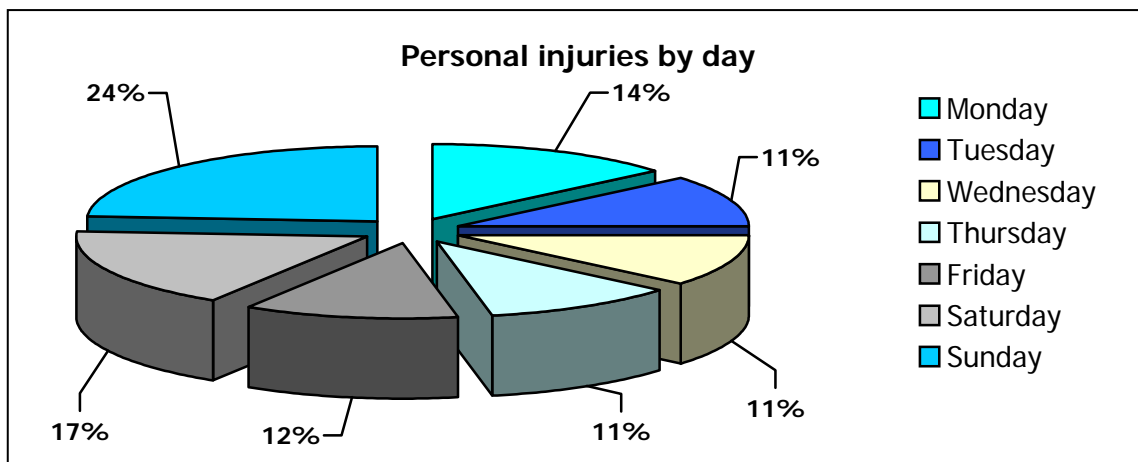

During 2006 the main motives that prompted these crimes were quarrels and personal vengeance, with a participation of 43% or 19.799 cases and 39% or 17.915 cases, respectively. While comparing the 2006 data to 2005, there was a significant increase of 91% in the personal injuries that occurred as a result of personal vengeance, increasing from 9.373 cases in 2005 to 17.915 cases in 2006.

In contrast to murders, in which most of the offenses were committed with firearms, in this offense, the most common weapons used to commit the crime during 2006 were clubs and blunt objects, with a participation of 53% and 24.769 cases, repeating the same pattern of 2005. In second place, the statistics reported the use of knives or cutting instruments with a participation of 22%. The use of firearms in this crime reported an increase of 9% when comparing 2006 with 2005 data, going up from 5.548 cases in 2005 to 6.042 cases during 2006.

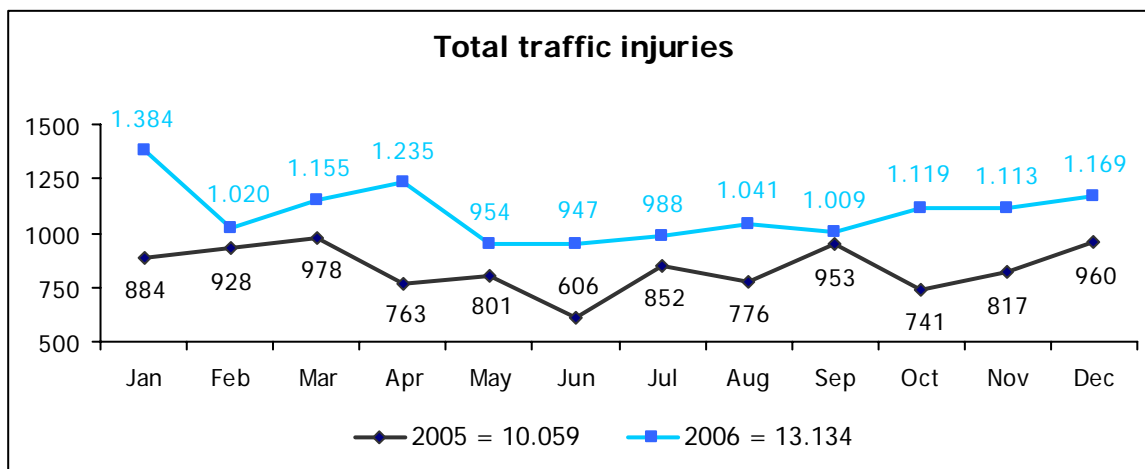

During 2006 the highest percentage of personal injuries occurred from 6:00 p.m. till midnight, with a participation of 32% and 14.980 cases, the same situation that took place in 2005, when 32% of the personal injuries occurred in that interval of time. When comparing the 2006 data to 2005, the occurrences of this offense from midnight to 6:00 a.m. increased 38% which means 2.515 more cases.

During 2006, Saturday and Sunday recorded the highest percentage of occurrence, with a participation of 17% and 24%, which equals to 7.828 and 11.232 cases, respectively.

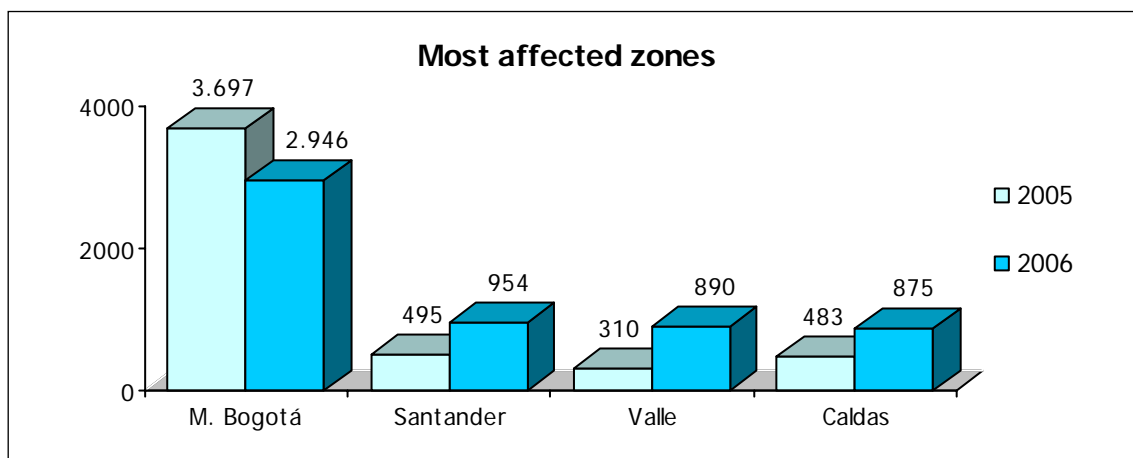

#### IV. TRAFFIC INJURIES

##### National volume, trends and rates

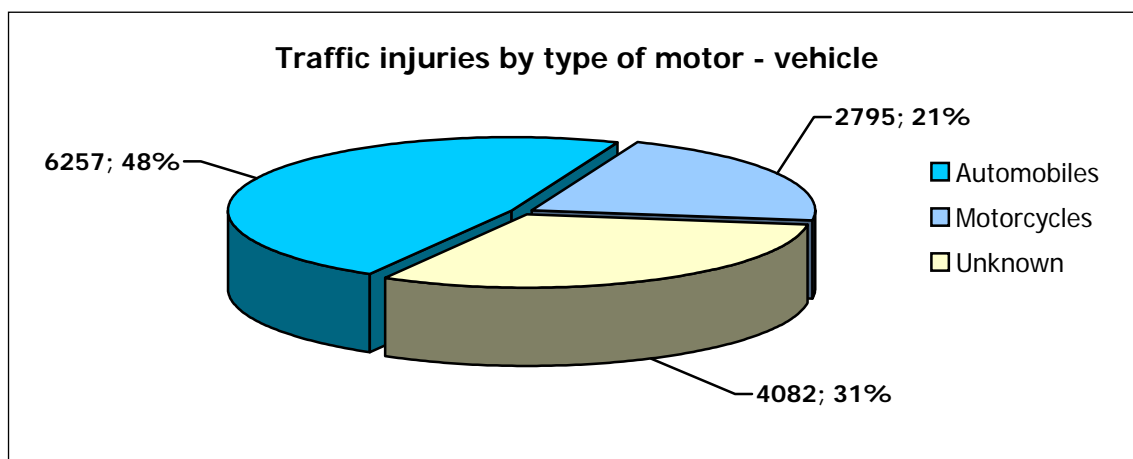

In 2006, occurrences of this offense increased 31% compared with the 2005 figure, going up from 10.059 to 13.134 cases, which means also an upward trend in the frequency of traffic injuries per 100.000 inhabitants, going up from 22 to 28.

The daily average during 2006 was 36, which means 9 more injuries per day than those recorded in the previous year. January, with 1.384 cases, recorded the highest peak while June recorded the lowest peak, with 947 cases.

Police departments that recorded the highest amount of cases during 2006 were the Bogotá metropolitan area, with 2.946 cases, and a 20% decrease when comparing with the same period in the previous year, Santander province, 954 cases and a 93% increase, Valle province, 890 cases and a 187% increase, and Caldas province, 875 cases and 81% increase.

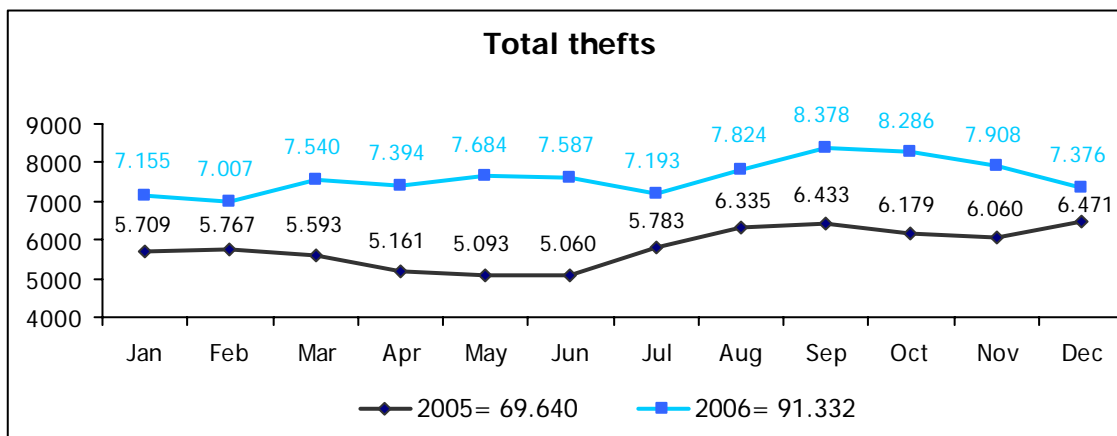

Analyzing the amount of injuries according with the type of vehicle which caused them, the 2006 data showed that 48% of those injuries were caused by automobiles, which correspond to 6.257 cases, 21% were caused by motorcycles, which correspond to 2.795 cases and 31% of the cases did not report information about the type of vehicle.

## V. THEFTS

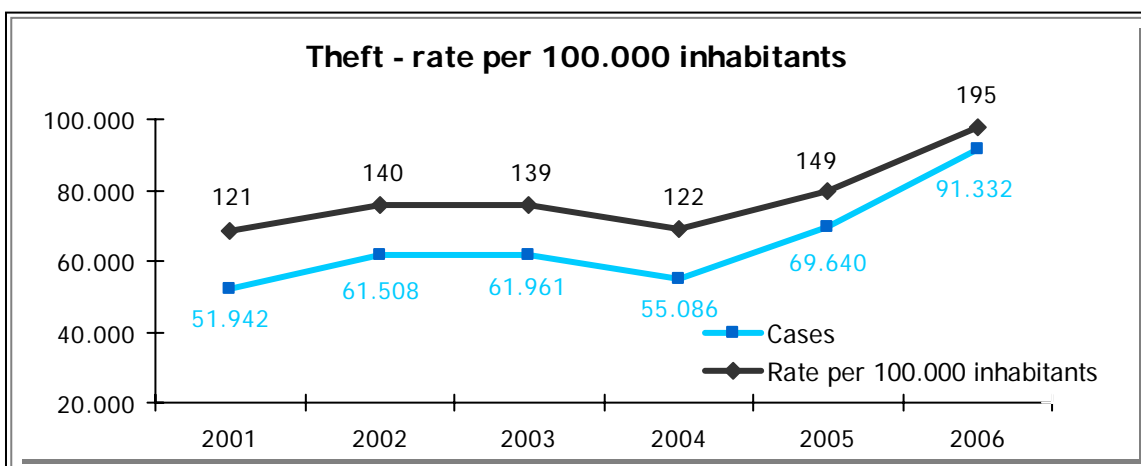

### National volume, trends and rates

During 2006, a total of 91.332 thefts were committed, reporting an increase of 31% when we compare with the 69.640 thefts committed the previous year or 21.692 more cases. The increase in this offense was caused especially by the greater impact of thefts to persons which increased 33%, reporting 13.558 more cases when comparing with 2005 data.

From February to September 2006, there was an upward trend reaching the highest amount of thefts in that month (8.378). From September onwards the number of thefts started falling until December.

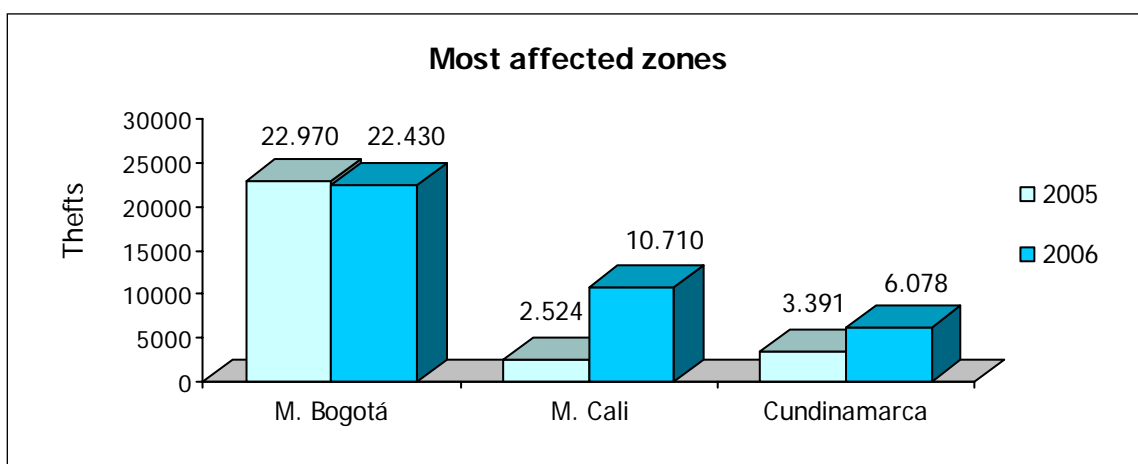

As we can see in the chart the lowest numbers of cases were reached in January and February with 7.155 and 7.007 cases respectively.

The theft-rate per 100.000 inhabitants reported an upward trend from the year 2000 until 2002 when it was 140, and remained in that level until the year 2003, starting from that time to diminish, reaching a rate of 122 in 2004. However, from 2004 onwards, there has been a continuous rise in the rate per 100.000 inhabitants which was 149 by December 31st, 2005 and went up to 195 in 2006.

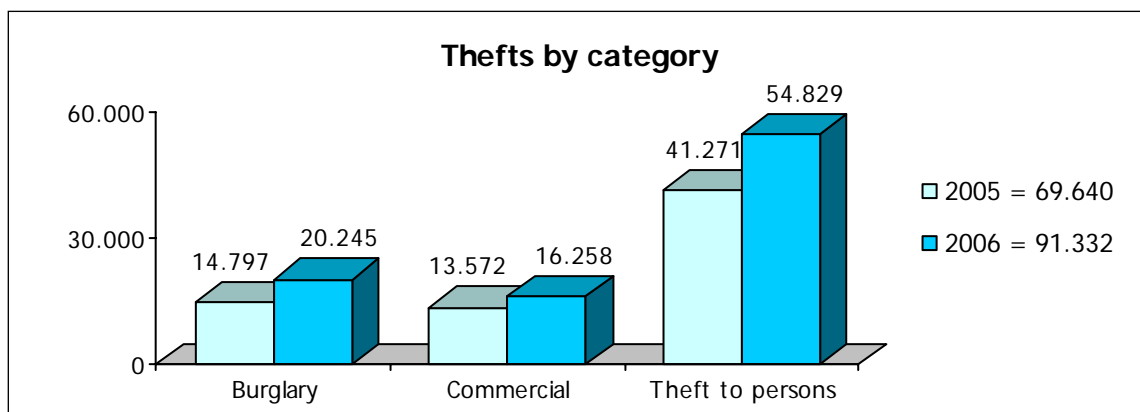

The daily theft average during 2006 was 256, which means, 61 more daily cases than those reported during the previous year.

When comparing the 2006 data to 2002, there was an increase of 48% with 91.332 cases. During 2004 there were 55.086 thefts, 6.875 fewer cases than those recorded in

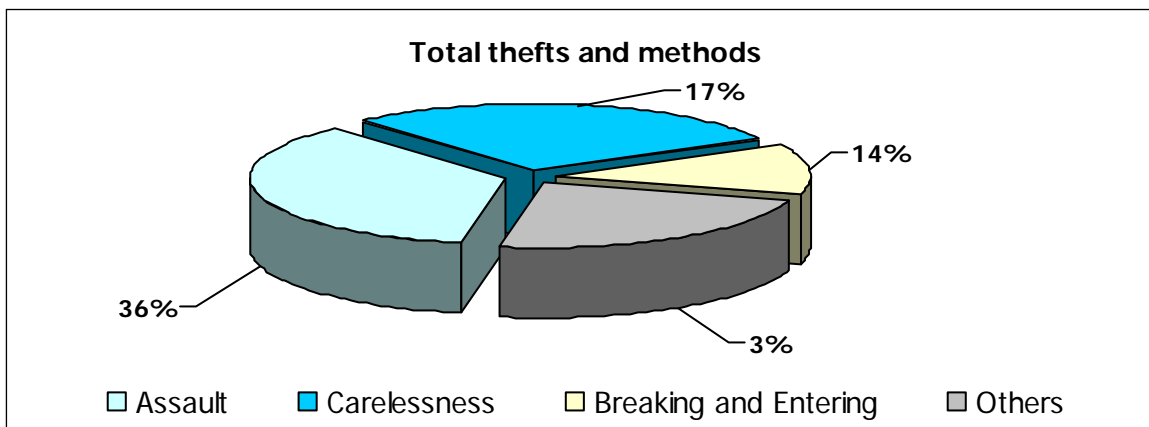

2003.

Police departments that recorded the largest amount of thefts were the Metropolitan Area of Bogotá with 22.430 cases and a decrease of 2% or 540 fewer cases, when comparing them with the same period in the previous year, the Metropolitan Area of Cali with 10.710 cases and a meaningful increase of 324% and Cundinamarca province who reported 6.078 cases and an increase of 79%.

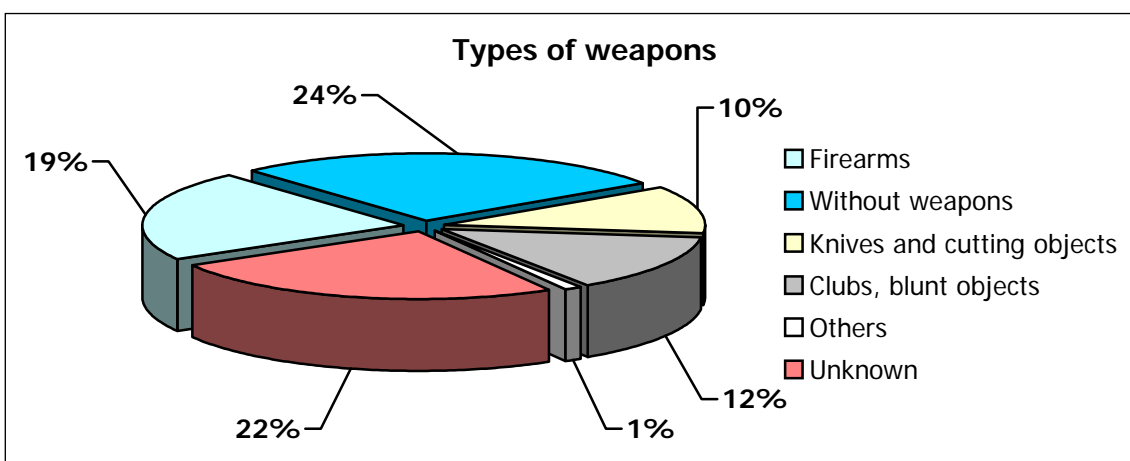

Analyzing the number of thefts by categories during 2006, the high participation of 60% corresponding to thefts to persons is indeed evident, which equals to 54.829 cases during 2006, reporting a remarkable increase of 33% comparing it with 2005 data, in which 41.271 thefts to persons were reported.

Home theft increased 37% going up from 14.797 to 20.245 cases, theft to commerce increased 20% which equals to 2.686 more cases.

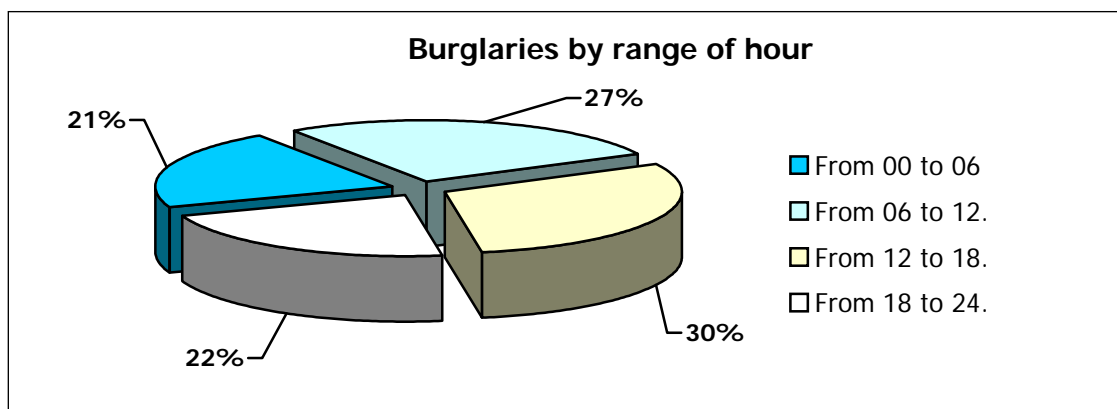

When analyzing the methods employed by the thieves in order to steal people's property in 2006, we can notice the same pattern recorded during the previous year in which assault on persons was rated in first place, with a participation of 36% of the total thefts; the carelessness of the people was the second cause that made easier for the robbers to assault their victims (17%). The category of forcing locks was ranked in third place, with 14% participation.

Most of the thefts were committed without weapons (24%) or 21.859 cases; 19% was the percentage of participation of firearms used to carry out crimes, which equals to 17.654 thefts; 10% corresponded to knives and cutting objects, 12% corresponded to

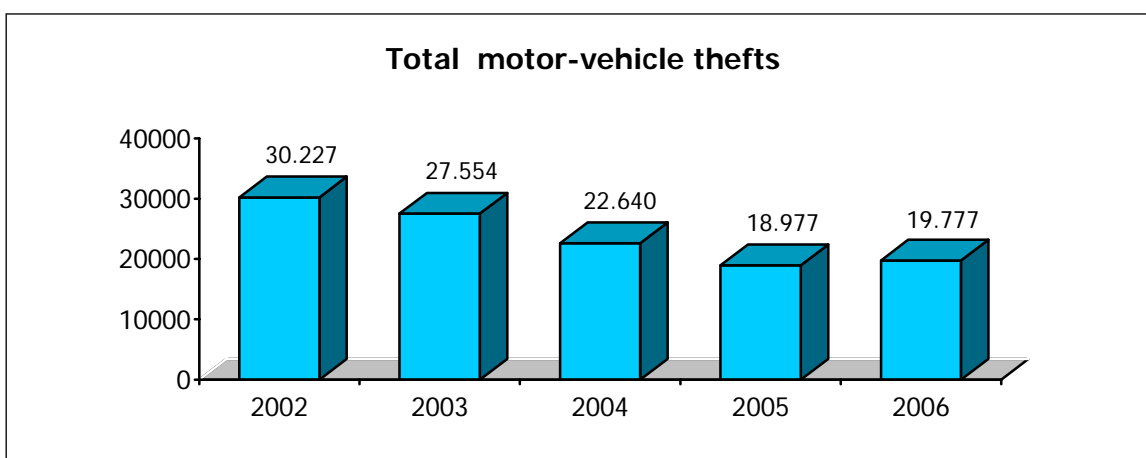

weapons such as clubs and blunt objects among others and the remaining 23% did not specify information about the type of arms used.

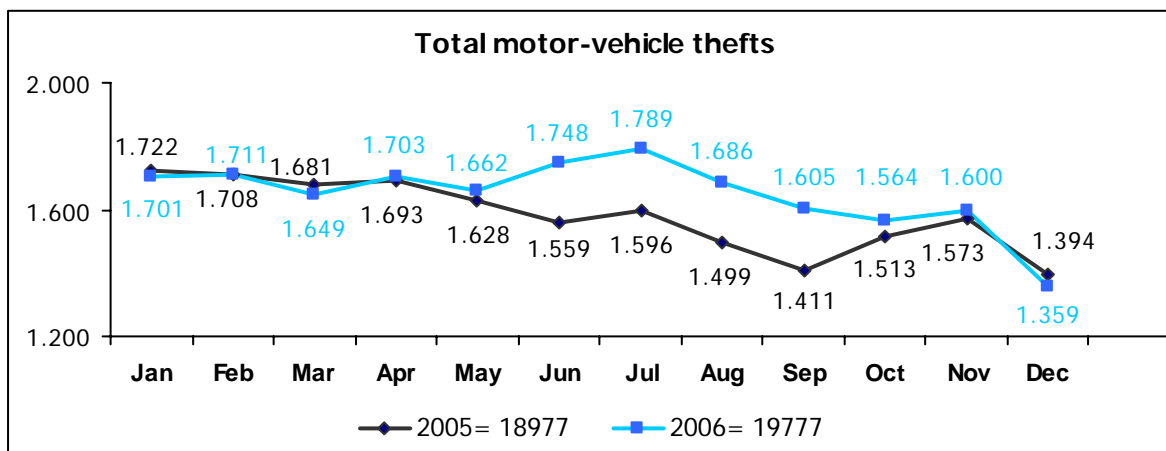

According to the hour of occurrence of these offenses, 30% of the burglaries occurred during daytime, from midday until 6:00 pm. The least amount of burglaries was committed from midnight to 6:00 a.m. (21%).

## VI. MOTOR-VEHICLE THEFTS

### National volume, trends and rates

From 2002 to 2005 there were continuous reductions in the number of motor-vehicle thefts, falling from 30.227 cases in 2002 to 18.977 in 2005, which equals to a 37% decrease. However, the 2006 data showed a 4% increase when comparing with the 2005 figure, reaching 19.777 cases.

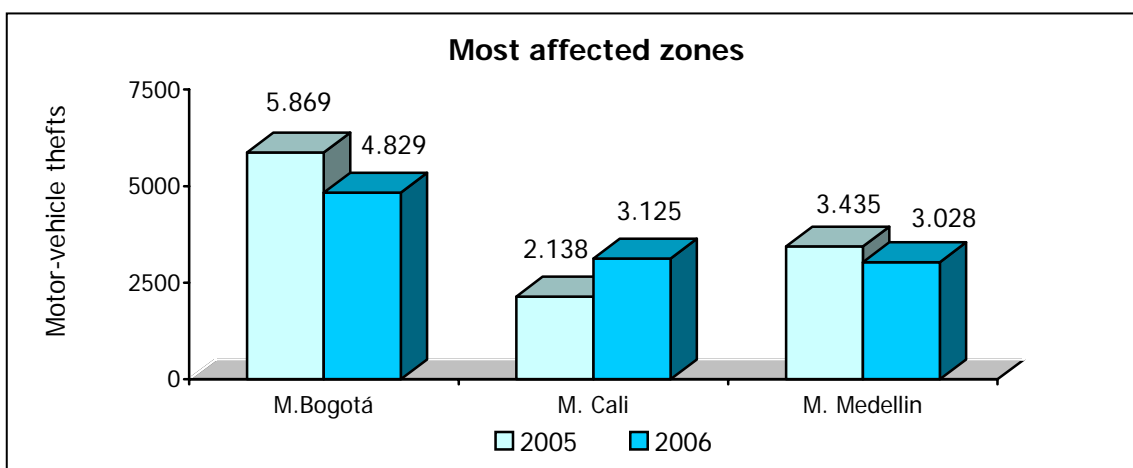

When comparing statistical records we can notice that the frequency of this crime increased of 800 more cases, which indicates a variation of 4%.

According to the 2006 data, from January to May, there was a slight downward trend in the number of motor-vehicle thefts, followed by increases during the next two months reaching the highest pick of the year in July with 1.789 cases.

Despite this increase in July, there was a notorious downward trend in the second semester of 2006, falling to 1.359 cases by December 31<sup>st</sup>, which means 35 fewer cases compared with the figure of the previous year.

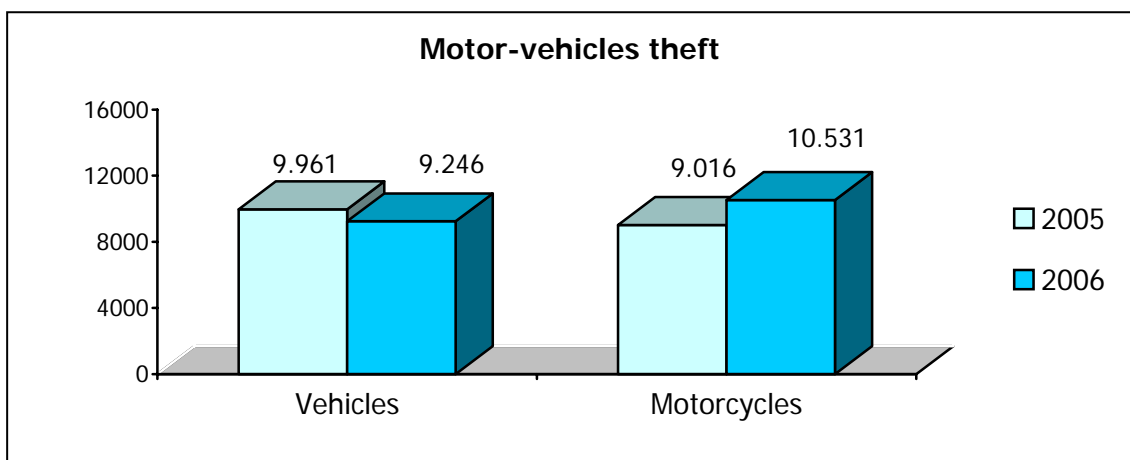

The daily average during 2006 was 55, or 2 more cases per day than those reported in 2005.

During 2006, the metropolitan areas of Bogotá, Cali and Medellín, recorded the largest amount of motor-vehicle thefts with 4.829, 3.125 and 3.028 cases respectively.

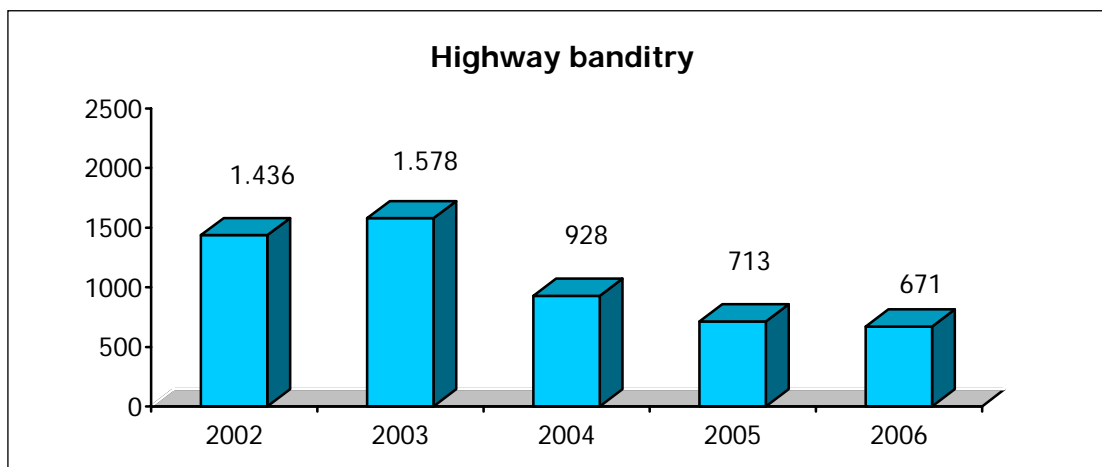

When comparing 2006 with 2005, the figures reported decreases of 18% and 12% in the metropolitan areas of Bogotá and Medellín, while there was an increase of 46% thefts in the metropolitan area of Cali of 46%.

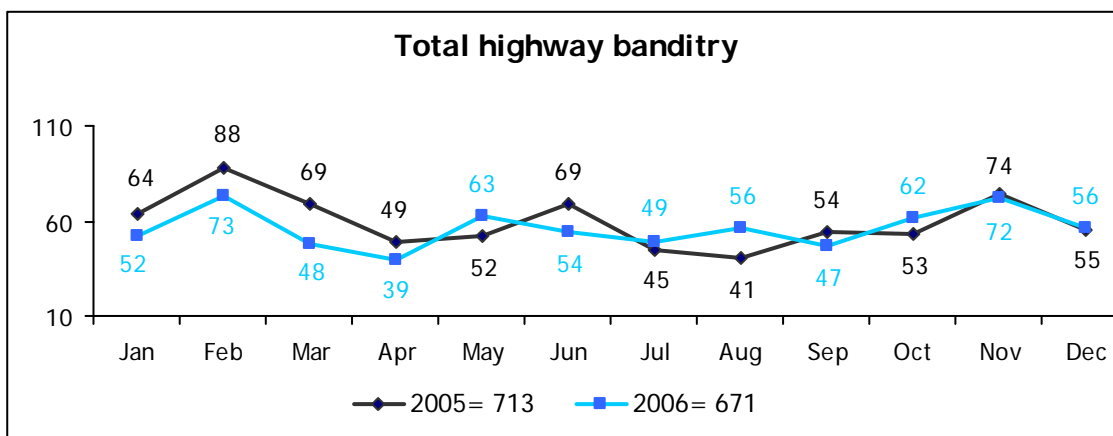

Analyzing the information by categories, there was a decrease related to auto-thefts (7%) falling from 9.961 stolen cars during 2005 to 9.246 in 2006 while the motorcycles showed a 17% increase going up from 9.016 stolen motorcycles in 2005 to 10.531 in 2006.

## VII. HIGHWAY BANDITRY

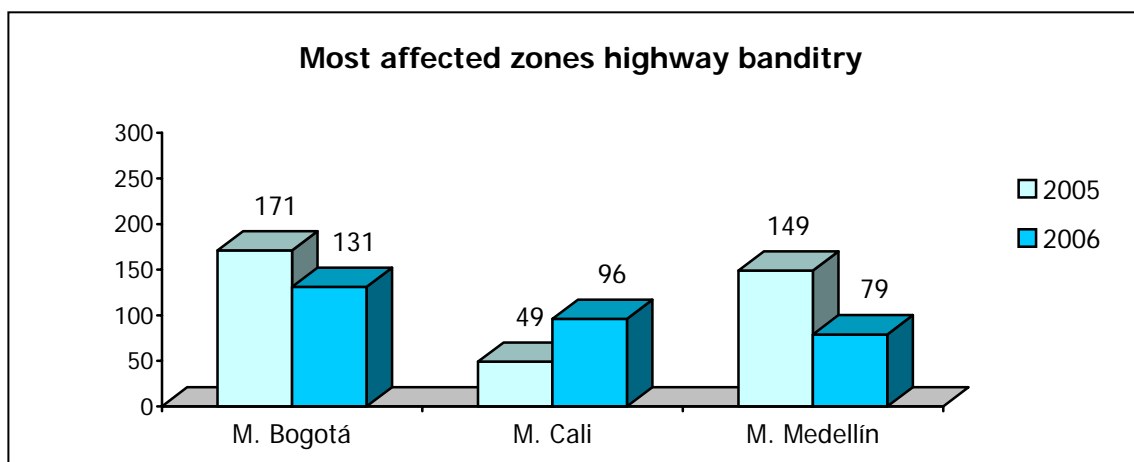

### National volume, trends and rates

There was a decrease of 6% regarding this offense, when comparing the years 2005 and 2006, falling from 713 cases during the first year to 671 during the second year, which means 42 fewer cases.

February reported the highest peak, 73 cases, followed by November with 72 cases. The occurrence of highway banditry throughout the Nation in 2006 was estimated at a rate of 2 cases per day, the same figure recorded in 2005.

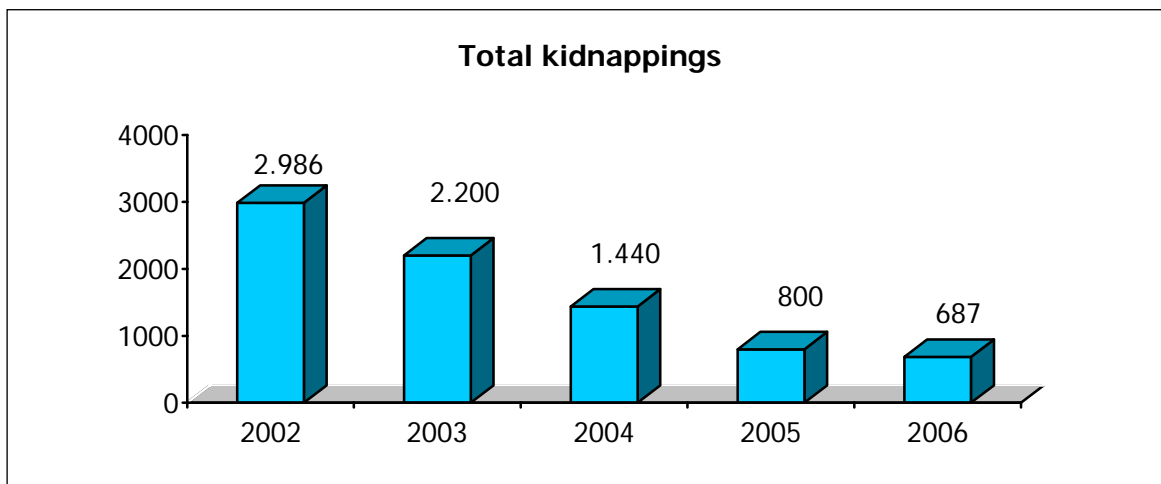

The roads of metropolitan areas of Bogotá, Cali and Medellín, with 131, 96 and 79 cases respectively, were the most affected zones during 2006.

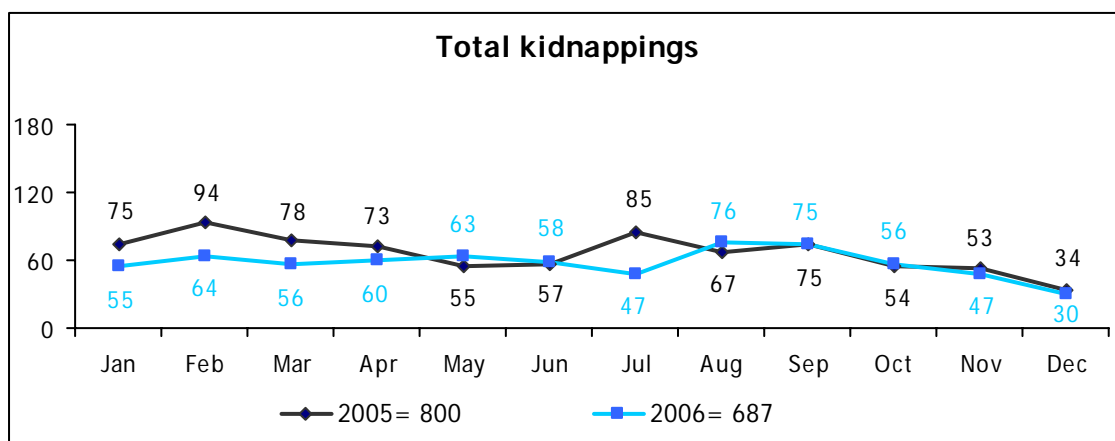

Although Bogotá reported the highest number pertaining to this offense during 2006, it also showed a significant decline of 23% while comparing with de 2005 data, which means 40 fewer cases. Medellín also reported a decline of 47% or 70 fewer cases while Cali reported a remarkable increase of 96% or 47 more cases.

### VIII. KIDNAPPINGS

#### National volume, trends and rates

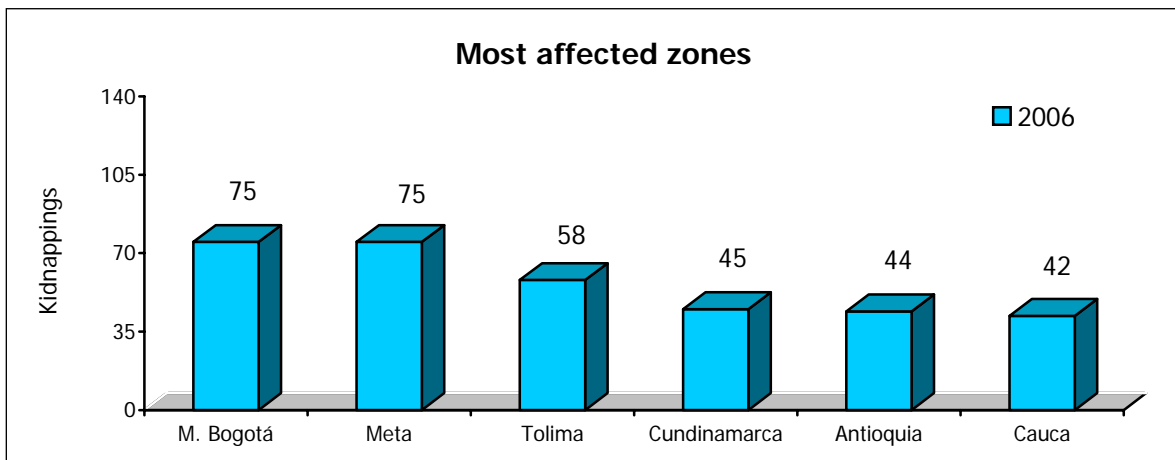

The 2006 data showed a significant reduction of 77% in this crime, falling from 2.986 cases in 2002 to 687 cases in 2006.

This crime showed a significant decrease of 14%, which is equivalent to 113 fewer cases, with a daily average of 2 cases per day in 2006 (the same figure recorded in 2005).

During the first semester of 2006, there was an average of 59 kidnappings per month, followed by July with the lowest number of cases (47). August and September recorded the highest number of kidnappings with 76 and 75 cases respectively. However, since September there was a favorable downward trend, falling to the lowest amount of kidnappings in December 2006, 30 cases. The rate per 100.000 inhabitants also decreased from 2 cases in 2005, to 1 case in 2006.

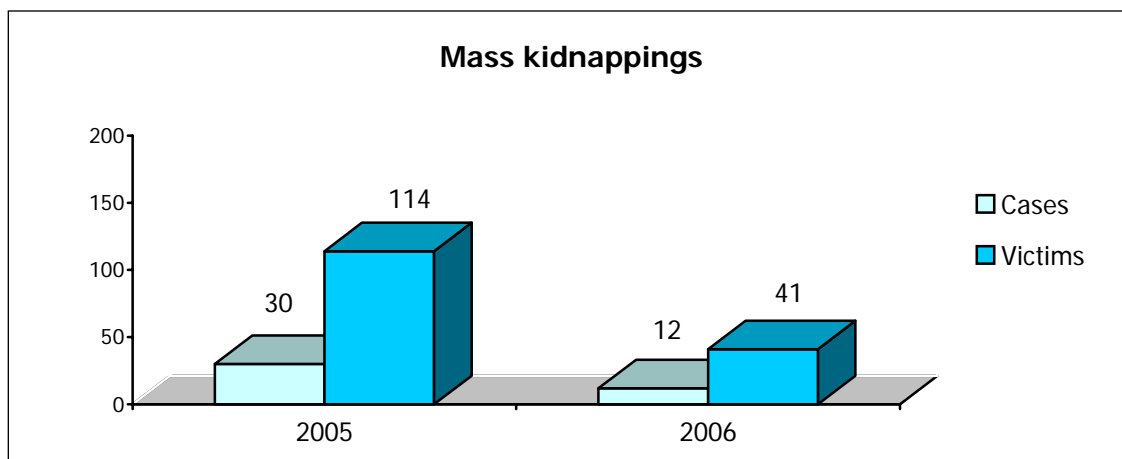

During the year 2006 the most affected zones of the country by this crime, were the metropolitan area of Bogotá (75 cases) and the provinces of Meta (75 cases), Tolima (58 cases), Cundinamarca and Antioquia, with 45 and 44 cases respectively, and Cauca province with 42 cases.

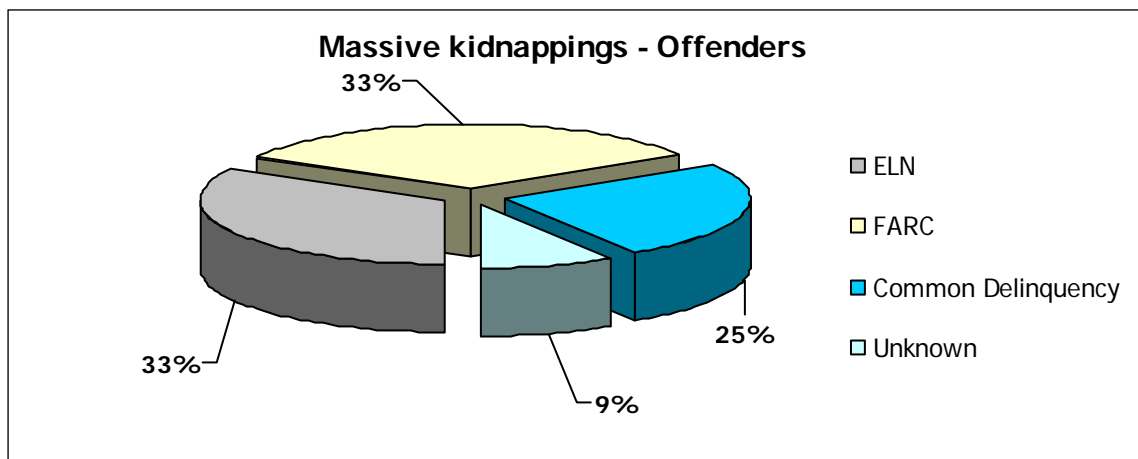

We would like to point out that in Cauca province, this criminal activity decreased 30% falling from 60 cases in 2005, to 42 cases in 2006. In Cundinamarca province it decreased 22%, in Meta province it fell 13% (from 86 to 75 cases). In contrast, the metropolitan area of Bogotá reported a significant increase of 108%.

### IX. MASS KIDNAPPINGS

The phenomenon of mass kidnapping started to be registered since 1999. Before that year this crime was reported in some provinces of the country and its accountancy was

taken within the total kidnappings. From 1999 onwards, due to the intensity and magnitude of its occurrences, this offense started to be registered in a separate way, reaching its highest peak in 2001 and keeping a downward trend until 2006.

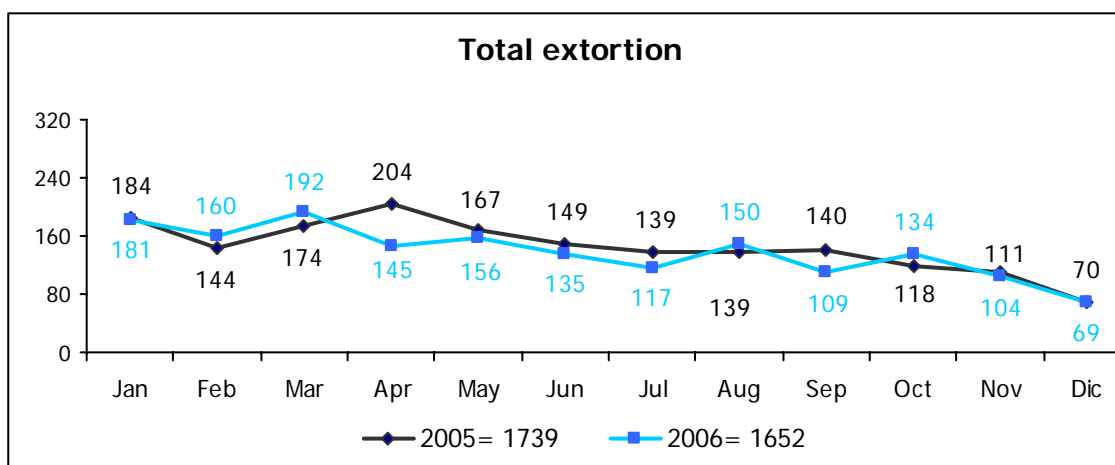

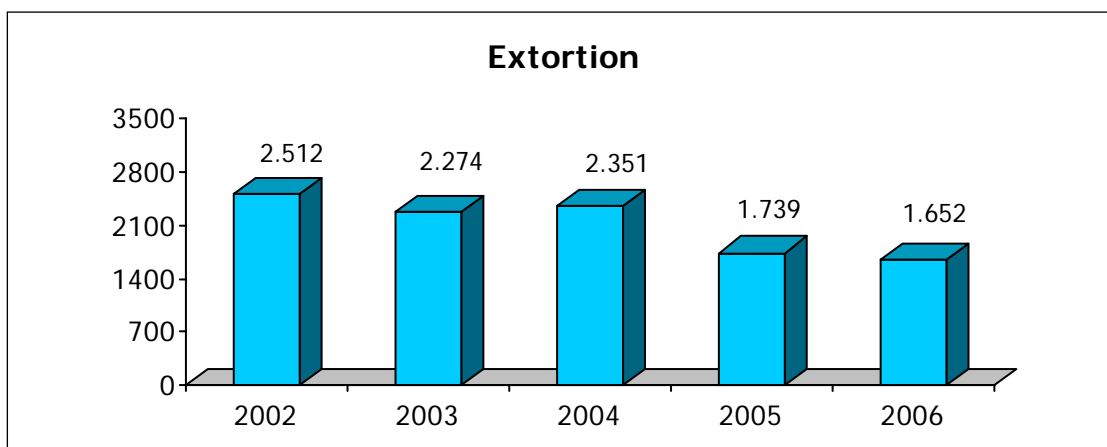

During 2006 there were 12 cases and 41 victims, which represents a 60% decrease in the total number of cases and a 64% decrease in the total number of victims, compared with the previous year data.

According to the figures shown in the graph, 33% of the kidnappings were committed by the FARC, (the Revolutionary Armed Forces of Colombia) 25% were attributable to common delinquency, 33% were committed by the subversive group ELN, (The National Liberation Army). In 9% of the cases, there was no information about the offenders.

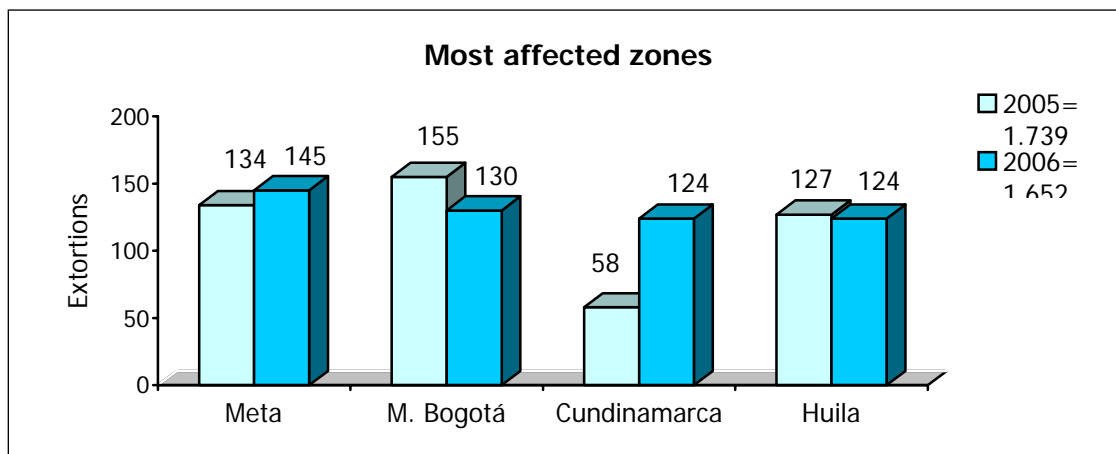

## X. EXTORTION

### National volume, trends and rates

This crime, which affects directly the coexistence and citizen's safety, has recorded a decline of 5% with a difference of 87 fewer cases during 2006 compared with the 2005 data. A breakdown of the data by months showed that January and March reported the highest peaks with 181 and 192 cases while November and December reported the lowest figures, with 104 and 69 cases, respectively.

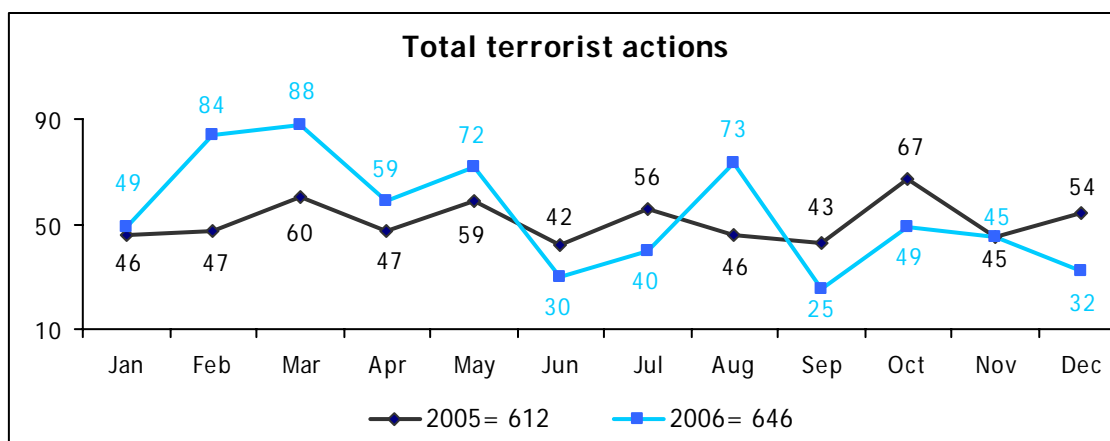

In 2006 the daily average was 5 cases per day and the rate per 100.000 inhabitants was 4 cases, figures that remained equal to those recorded during 2005.

During 2006, Meta province and the metropolitan area of Bogotá, recorded the highest frequencies of this offense, with 145 and 130 cases respectively, followed by Cundinamarca and Huila provinces, with 124 cases of extortion each one. When comparing the 2006 data with 2005, Meta and Cundinamarca provinces showed increases of 8%, 114%, while the metropolitan area of Bogotá and Huila recorded drops of 16% and 2% respectively.

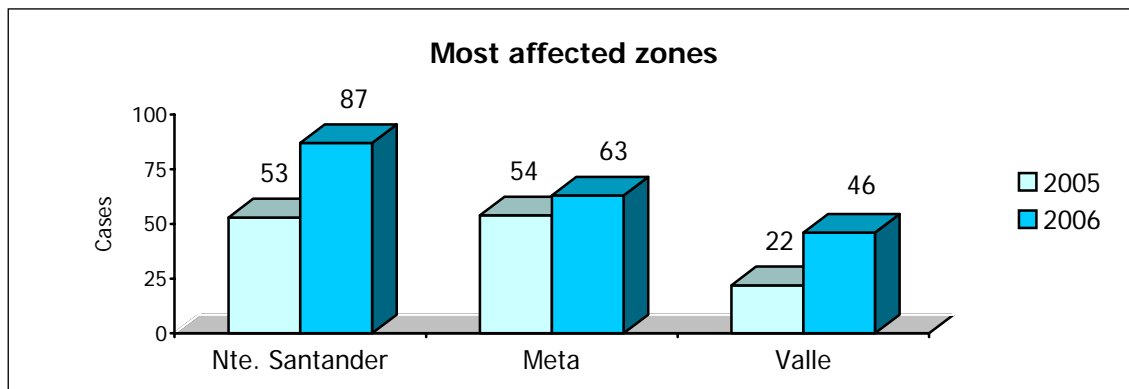

## XI. TERRORIST ACTIONS

### National volume, trends and rates

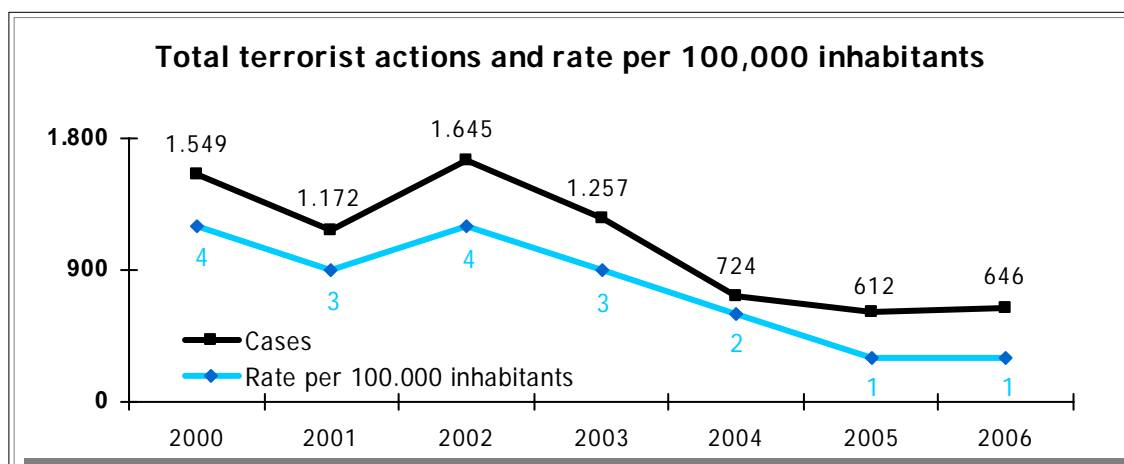

This criminal activity recorded a 6% increase. It is a very serious phenomenon affecting gravely the State, due to the devastating effects caused to the citizen's life and property.

The 2006 data showed an increasing trend during the first three months reaching a peak of 88 cases in March. From March onwards the figures showed irregular ups and downs, where August recorded the highest peak, 73 cases and September the lowest figure, 25 cases.

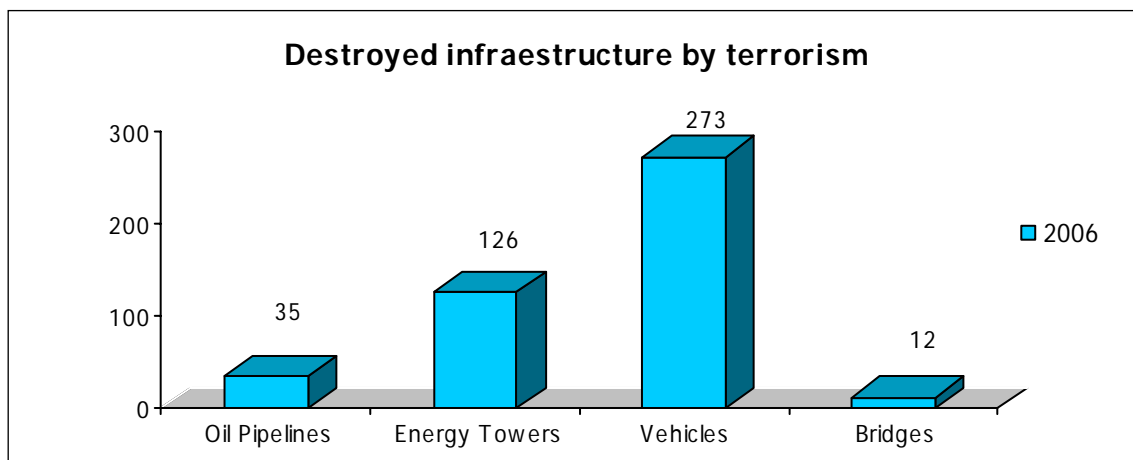

During 2006, the largest amount of terrorist actions occurred in Norte de Santander and Meta provinces, with 87 and 63 cases respectively, followed by Valle province with 46 cases.

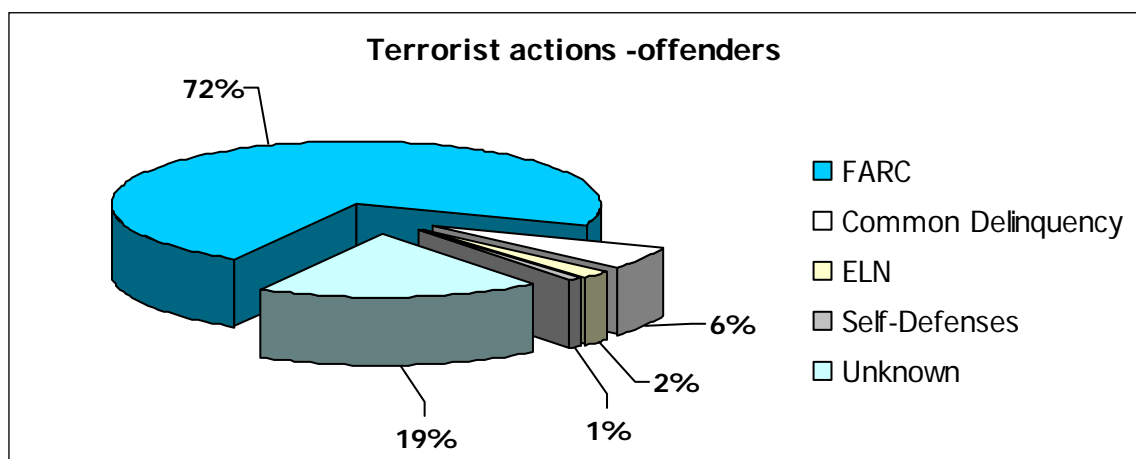

Norte de Santander was the most affected province by this scourge during 2006 reporting an increment of 64% compared with the 2005 data, which means 34 more cases; in the same way Meta and Valle showed increases of 17% and 109% respectively.

Since 2002, there has been a continuous reduction in the terrorist-actions rate per 100.000 inhabitants which has dropped from 4 cases in 2002 to 1 case in 2006. When comparing the 2002 with 2006 data, there has been a significant reduction of 61% in this crime, falling from 1.645 cases in the first year to 646 cases in 2006.

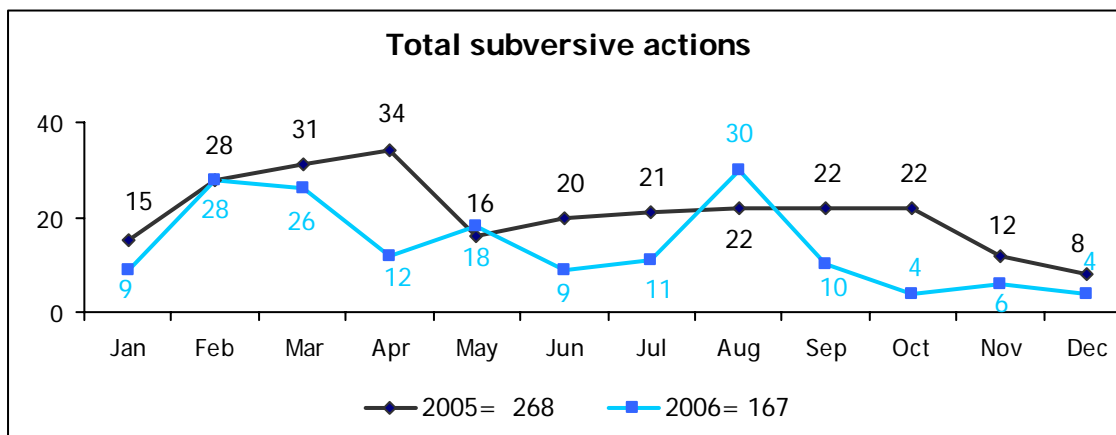

The most affected assets by terrorist actions were vehicles and energy towers, followed by oil pipelines and bridges, since the armed groups have recorded a historic trend to attack international and local petroleum companies. These terrorist actions caused irreparable losses of human lives and a significant monetary cost for the economy of the country.

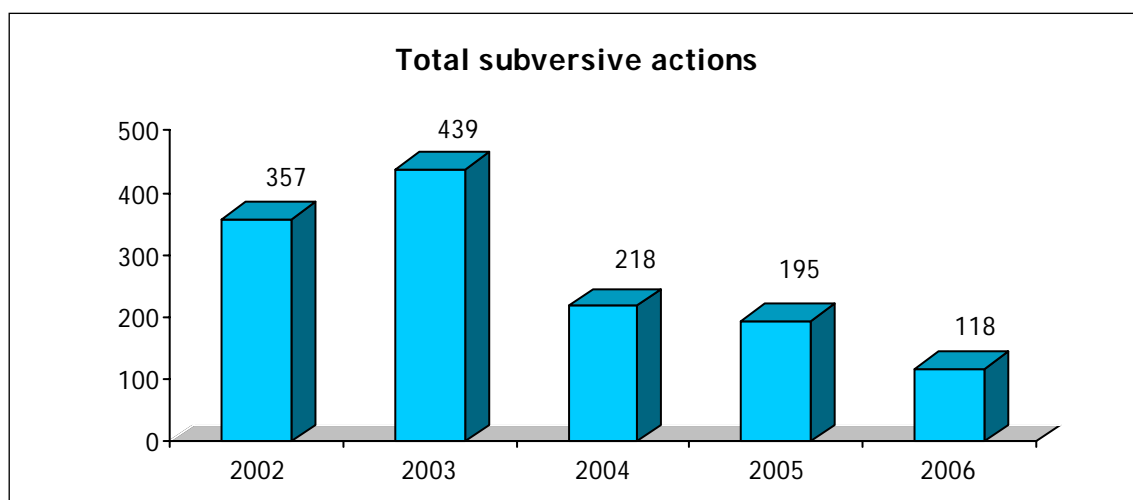

Analyzing the information related to the offenders of this crime, the figures showed that 72% of the terrorist actions are attributable to the armed group FARC, which accounts for 466 terrorist actions. The common delinquency, the ELN guerrilla group and the self-defense groups committed 6%, 2% and 1% of the terrorist actions throughout the nation, respectively.

## XII. SUBVERSIVE ACTIONS

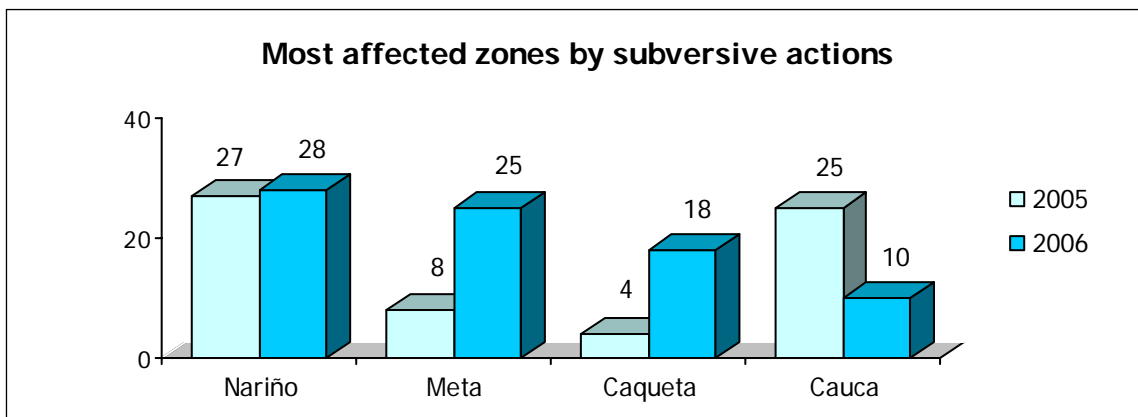

### National volume, trends and rates

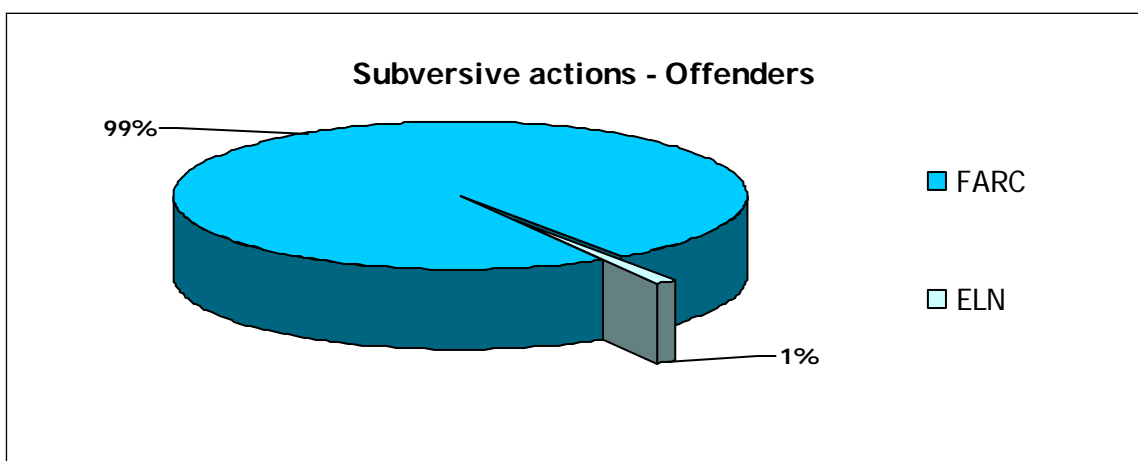

This criminal activity reported a 38% decrease or 101 fewer cases, when comparing the two years object of this study. However, when evaluating the monthly variations during 2006, the highest peaks were recorded in February, March and August, with 28, 26 and 30 cases, respectively. From August onwards, there was a downward trend reaching the lowest number of subversive actions during November and December with 4 cases each month.

When comparing the 2002 data with 2003, the statistics showed an increase of 23% or 82 more cases. However, this trend changed from that year falling from 439 subversive actions to 218 in 2004, 195 in 2005 and 118 subversive actions in 2006.

In 2006, Nariño province recorded the largest number of subversive actions, with 28 cases, followed by Meta, Caquetá and Cauca provinces with 25, 18 and 10 cases respectively. Cauca province reported a 60% decrease in the frequency of this offense falling from 25 subversive actions to 10.

The 2006 data showed that 99% of the subversive actions were committed by the armed group FARC (the Revolutionary Armed Forces of Colombia) and 1% of the actions were committed by the ELN (the National Liberation Army).

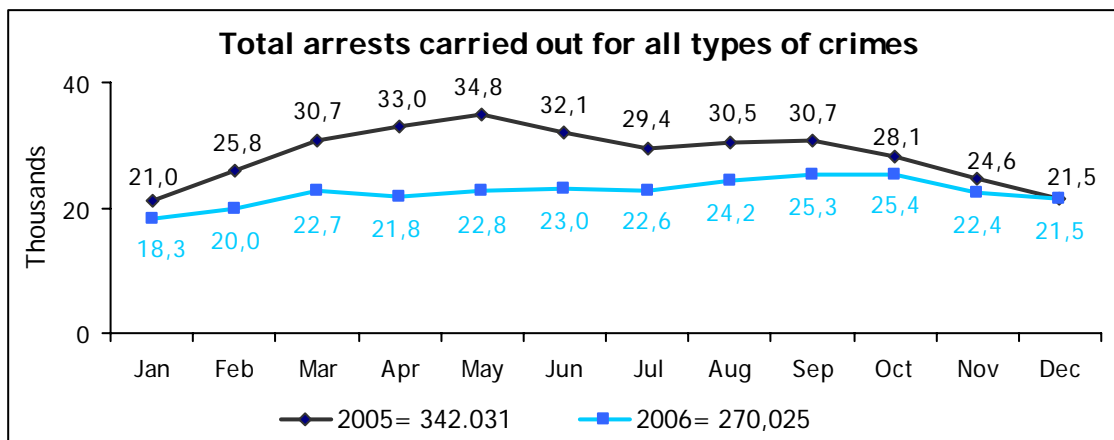

## COLOMBIAN NATIONAL POLICE OPERATIONAL ACHIEVEMENTS

OPERATIVE ACHIEVEMENTS		YEAR		VARIATION	
		2005	2006	ABSOLUTE	PERCENTAGE
ARRESTS (FOR ALL CRIMES)		342.031	270.025	-72.006	-21%

## I. ARRESTS CARRIED OUT FOR ALL TYPES OF CRIMES

### National volume, trends and rate

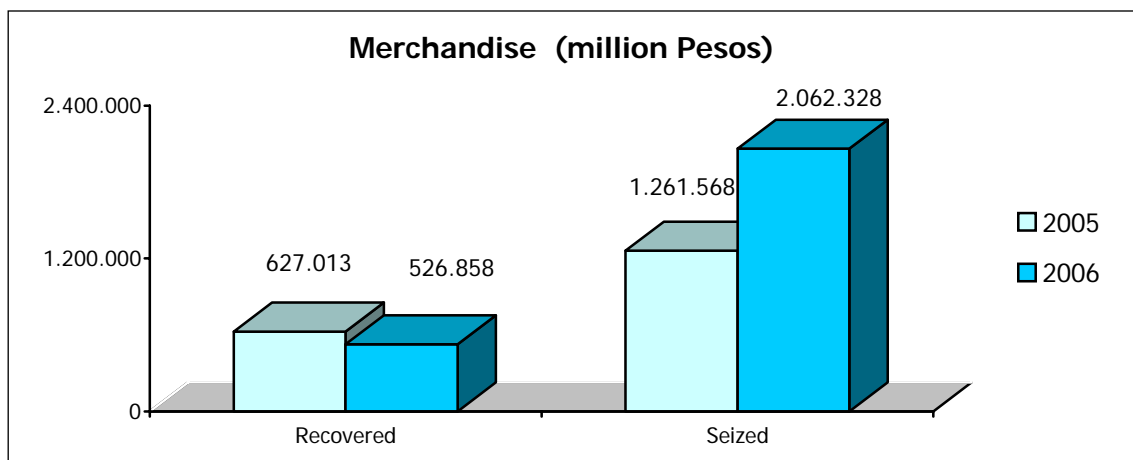

This operative activity showed a decrease of 21%, reaching a total of 270.025 people arrested in 2006, which represents 72.006 fewer arrests than those that took place in 2005, with a daily average of 740.

The 2006 data showed an upward trend in the number of captures from January to October when it reached a peak of 25.392 arrests and started falling to 21.481 captures in December.

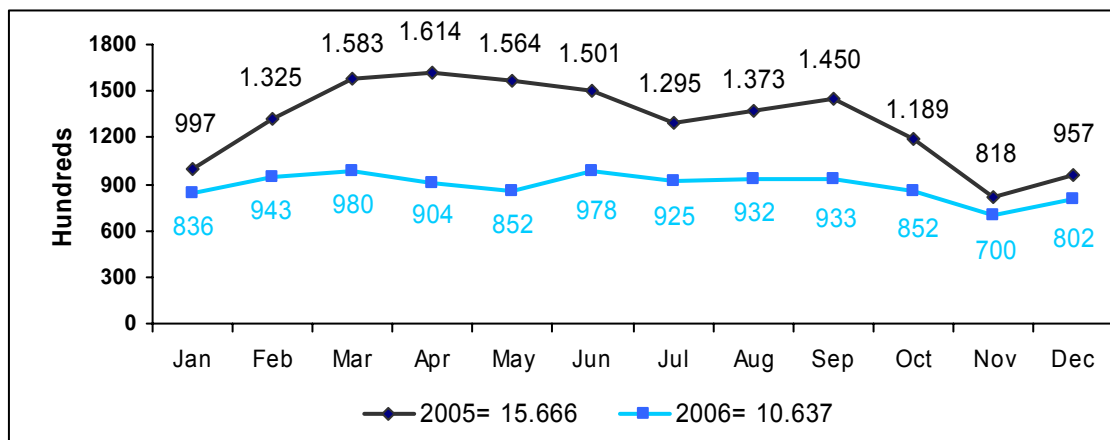

In the case of subversive and self-defenses arrests, for the year 2006, there was a decrease in comparison with the year 2005. For instance, during the year 2006, there was a decrease of 8% in the number of subversives arrested and 61% in the number of self-defenses (also known as “paramilitaries”).

## II. RECOVERED AND SEIZED MERCHANDISE

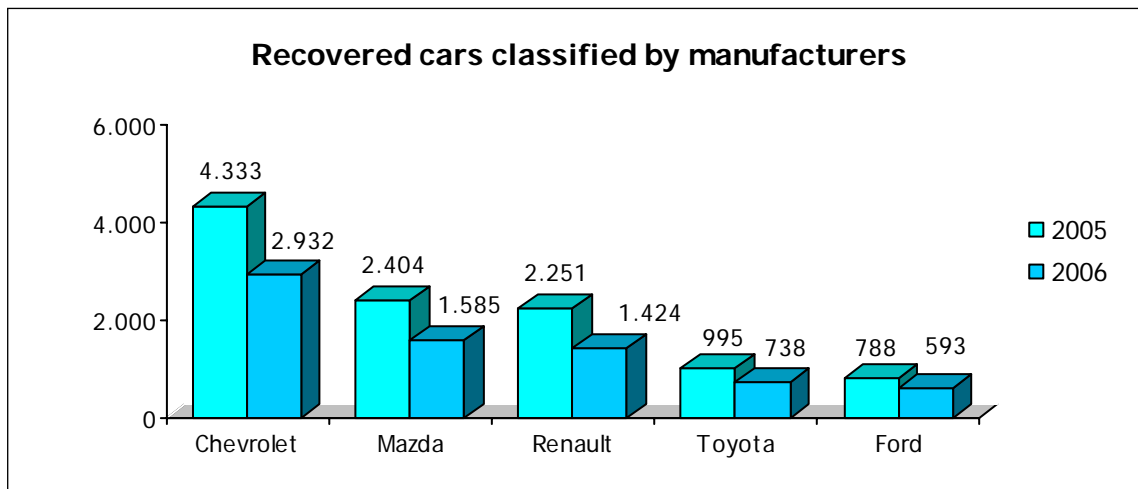

The operative achievements in the field of seized merchandise show a positive trend with a significant increase of 63% when comparing the years 2005 and 2006. Regarding recovered merchandise, there was a drop of 16% in the value of recovered goods.

## III. RECOVERED MOTOR-VEHICLES

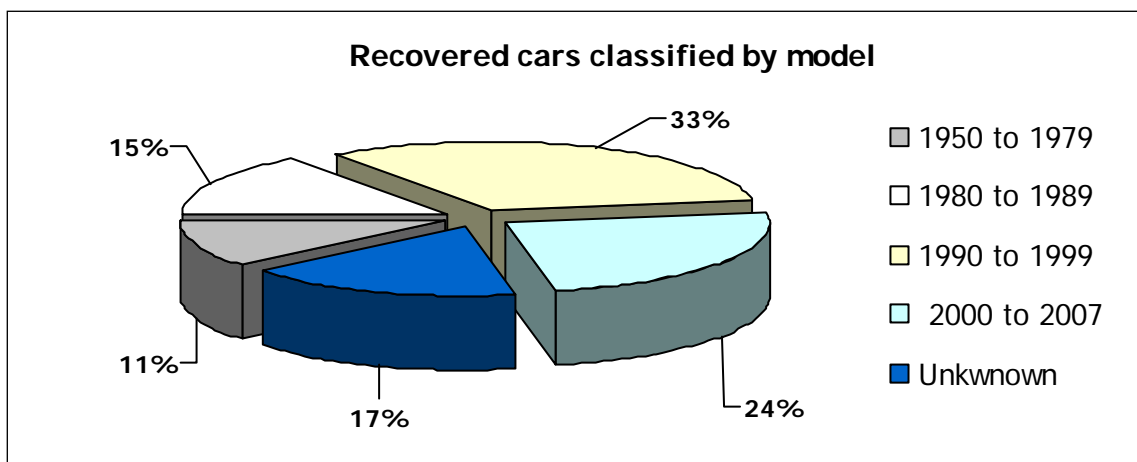

The 2006 data showed a 32% decrease in this operative activity, which means 5,029 fewer recovered vehicles than those recovered in 2005.

During the first nine months of 2006, there was a monthly average of 920 recovered vehicles. From September onwards there was a downward trend, falling from 933 recovered vehicles to 700 in November and 802 in December.

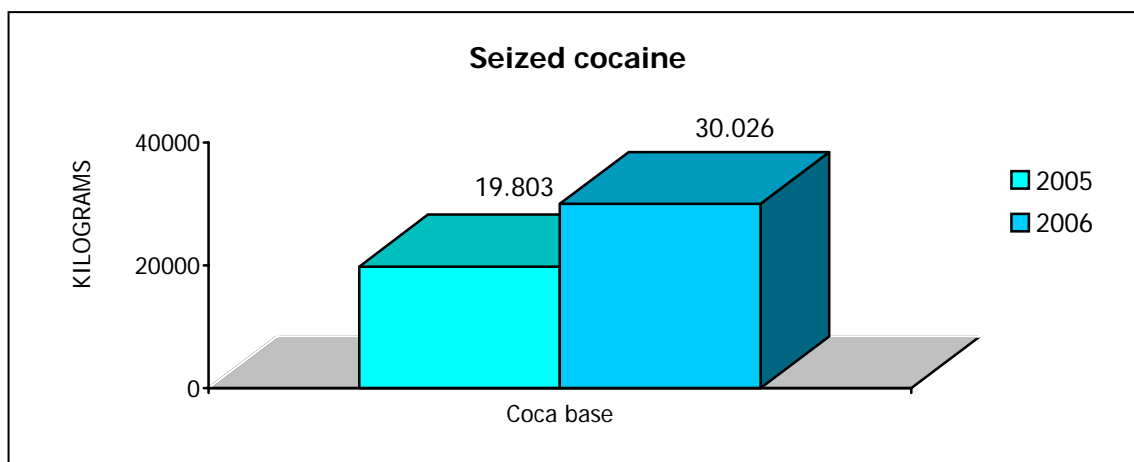

Analyzing the statistics by car manufacturers, 28% of the recovered cars during the last two years have been Chevrolet, with a total of 2,932 cars during 2006, 1,401 less than those recovered in 2005; in second place, Mazda and Renault recorded a total of 1,585 and 1,424 recovered cars, respectively, followed by Toyota and Ford, with a participation of 7% and 6%, also 738 and 593 recovered cars, respectively.

Most of the recovered cars during 2006 corresponded to models from 1990 to 1999, followed by models from 2000 to 2007. There was a fewer participation of older recovered cars whose models were rated from 1950 and 1979.

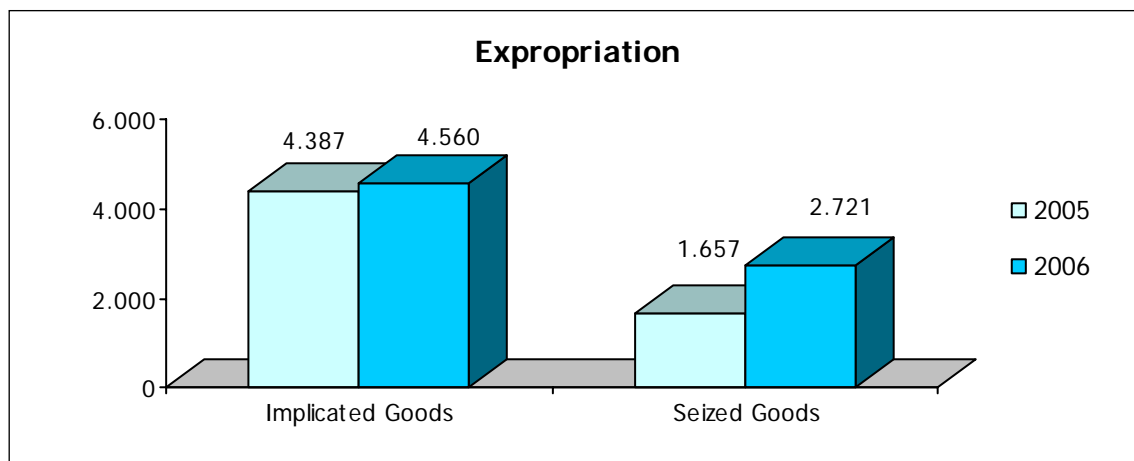

#### IV. ILLICIT DRUG SEIZURES

Since drug trafficking is the most important source of funding for the guerrillas, the Antinarcotics Police has done a significant work in this field to tackle the organized crime based on this illegal activity.

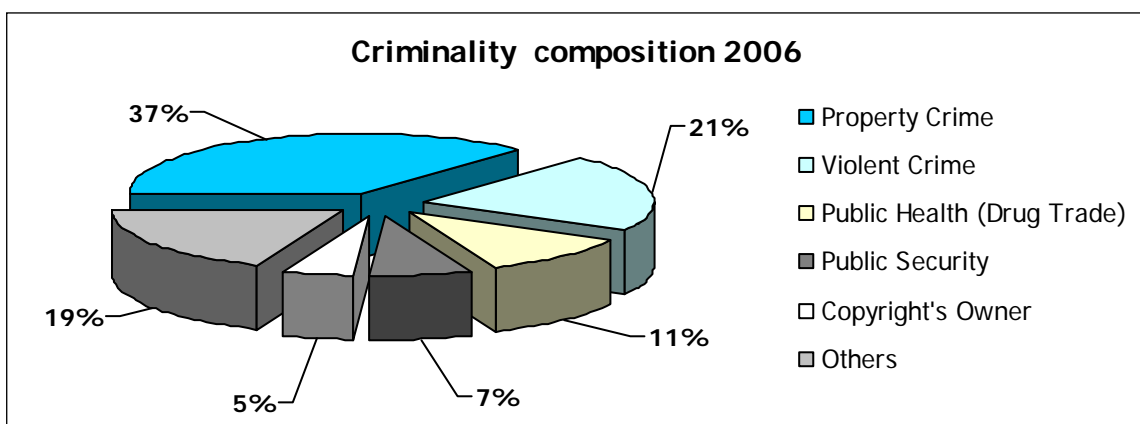

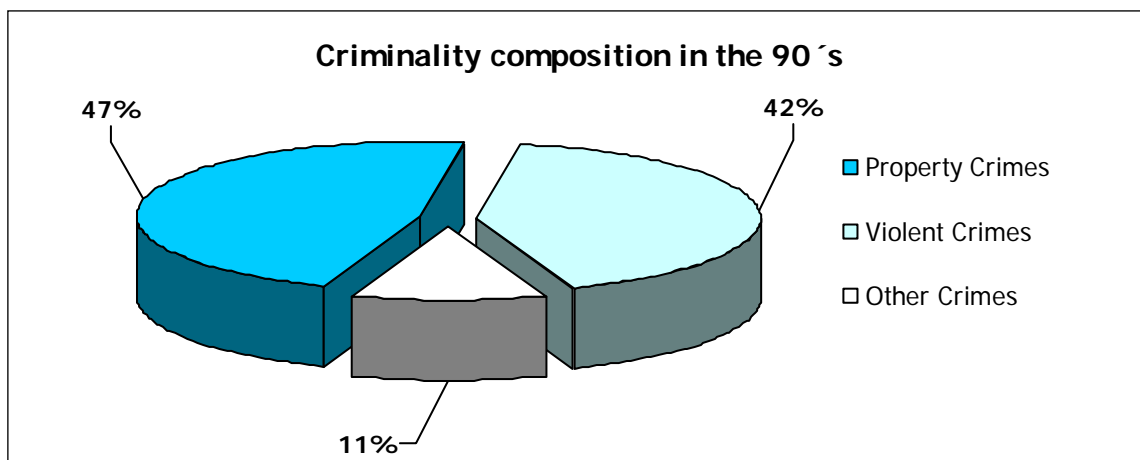

During the year 2006, 30.026 kilograms of coca base were seized by the Colombian Police. This represents an increase of 67% in contrast with the 2005 data.

#### V. EXPROPRIATION

The Colombian National Police is also developing intensive operations in the field of expropriations. For instance, comparing the years 2005 and 2006, the sharp increase of 64% in the number of seized goods is obvious. This trend is similar in the case of the goods under investigation by the judiciary, which experienced an increase of 4%.

### CHANGES IN THE CRIMINALITY COMPOSITION

OFFENSES	2004	%	2005	%	2006	%
Violent crime	69.209	23%	62.621	19%	81.359	21%
Property crime	116.173	38%	117.241	35%	142.549	37%
Against The Public Security* (includes Firearms Traffic)	19.703	6%	19.874	6%	25.060	7%
Against Copyright's owner	10.498	3%	19.227	6%	18.633	5%
Against The Public Health (Especially drug trade)	48.423	16%	61.269	18%	44.006	11%
Others	43.761	14%	53.834	16%	72.268	19%
<b>TOTAL</b>	<b>307.767</b>	<b>100%</b>	<b>334.066</b>	<b>100%</b>	<b>383.875</b>	<b>100%</b>

The figures in the previous charts, showed a significant change in the criminality composition, with a reduction in the percentage of violent crimes, falling from 42% in the 90's, to 23%, 19% and 21% in 2004, 2005 and 2006 respectively.

On the other hand, the offenses against the Economic Patrimony continue having the highest percentage of participation of the total number of crimes, 35% and 37% during the years 2005 and 2006, respectively. In contrast, offenses against the Public Health presented a reduction in participation going down from 18% to 11% in 2005 and 2006, respectively. Other crimes have had an increase in their percentage of participation, especially offenses against the Public Security with 7% of participation in 2006, as a consequence of the higher incidence during the last 10 years, of drug and arms traffic, committed by self-defenses groups, subversives and other outlaw groups.

## CONCLUSIONS

### SOCIAL IMPACT OFFENSES COMPARISON

- ♦ This report shows an important success on violence reduction achieved by Colombian National Police, as follows:
- ♦ In 2006 Colombia reached the lowest homicide rate of 37 cases per 100.000 inhabitants, which had never been achieved before during the last 25 years, which equals to 17.479 cases. In 1981, the same rate of 2005 was recorded. However, the total number of cases reached 10.805 and the population at that time was of 29'080.0000 inhabitants. While the colombian population grew 58%, the homicides rate remained constant.
- ♦ The favorable 3% reduction in the total homicides when comparing the 2006 data to 2005 equals to 632 less. However, this figure is more relevant when comparing the 2006 data with 2002, corresponding to a 39% decrease or 11.358 fewer homicides, falling from 28.837 in 2002, to 17.479 occurrences in 2006.
- ♦ The amount of 28.837 homicides could be compared with the population of municipalities such as Abejorral (Antioquia), San Jacinto (Bolívar), Paipa (Boyacá), Salamina (Caldas) or La Calera (Cundinamarca), which would represent the extinction of those regions of the country.
- ♦ Auto-thefts recorded a 7% decrease, falling from 9.961 cases in 2005 to 9.246 reported in 2006, but we must point out the 47% reduction in this offense, when comparing the 17.303 motor-vehicle thefts occurred in 2002 with the cases recorded in 2006. This achievement has been possible as a consequence of the increment in the number of municipalities protected by the National Police throughout the country, as well as the preventive and control actions taken against this crime.
- ♦ During 2006, there were 42 fewer cases of highway banditry, which equals to a 6% reduction when comparing it with the 2005 data. The importance of this figure is noticeable when comparing the 1.436 cases reported in 2002 (765 more cases than those in 2006), this represents a remarkable decline of 53% regarding this offense.
- ♦ It is important to stress the fact that during the last five years the total cases of kidnappings decreased 77%, while comparing the 2002 data with 2.986 cases to 687 cases in 2006.

- ♦ These achievements have been reached thanks to the current Democratic Defense and Security Police, and have created a favorable climate for foreign investment in Colombia.
- ♦ In regard to extortion, this crime also recorded a 5% reduction or 87 fewer cases when comparing to the 2005 data.
- ♦ Although the terrorist actions recorded a 6% increase or 34 more cases than those occurred in 2005, the statistics become really significant when comparing the 2002 data with 1.645 cases of terrorism, to the 2006 data, with 646 cases, corresponding to a 61% decrease.

### COLOMBIAN NATIONAL POLICE OPERATIONAL ACHIEVEMENTS

- ♦ Illicit Drug Seizures: It is important to emphasize about the Police efforts oriented towards the fight against drug trafficking, which have led to significant increments in the amount of illicit drugs seized, when comparing the years 2005 and 2006, increments as 67% for coca base.
- ♦ There were a total of 270.025 arrests carried out by the Police for all crimes.
- ♦ Seized merchandise reported a significant 63% rise.
- ♦ An increment in the national zones protected by the National Police, after having 168 municipalities without police presence in 2002, the goal of covering the total area of the nation was reached.
- ♦ The reduction of 23% in illegal coca crops during 2006, which equals to 40.537 hectares. This an important accomplishment if we take into account the fact that six years ago, in 2000, there were 160.000 hectares used for illegal crops, amount that equals to the area of Bogotá, D.C; this means, 1.600 square kilometers.
- ♦ Colombian National Police (CNP) is also developing intensive operations in the field of expropriations. For instance, comparing the years 2005 and 2006, the increase of 64% in the number of seized goods is obviously a demonstration of its effort. This trend is similar in the case of the goods under investigation by the judiciary which experienced an increase of 4%.
